Class result, walk-forward 2019–25 pooled across every chair on this card: sides (mirror chairs counted once) 634–641 (49.7%); totals, hits in the training cut's direction, 754–886 (46.0%).

PIT at CLE · Thursday 2026-10-01 20:15 ET · Week 4 2026

League-wide only. Window: weeks 4–9, 2015–2025. $n \geq 10$. No team streaks. No half-EPA. Lines from nflverse games.csv (snapshot Oct 1). Scores and team-week stats through Week 3; EPA from play-by-play.

Line: PIT -2.5 / CLE +2.5, total 38.5. Trip: PIT → CLE 106 mi, 0 time zones. Rest: PIT 4 days, CLE 4 days. Roof: outdoors.

1. Season boxes

Wk	Team	Spot	Score	Line	ATS	Off yds	Rush	Pass EPA	Off EPA	Def EPA allowed	SR	TO
1	PIT	H vs ATL	20–13	-6.5	cover	279	58	-9.7	-16.3	-21.5	0.34	1
2	PIT	A at NE	3–20	+4.5	miss	278	91	-21.8	-22.2	-1.9	0.39	2
3	PIT	H vs CIN	30–27	+3.5	cover	430	138	+8.5	+11.3	+14.8	0.49	1
1	CLE	A at JAX	10–34	+8.5	miss	292	87	-5.6	-10.5	+16.7	0.43	2
2	CLE	A at TB	23–19	+8.5	cover	282	44	+10.4	+1.0	-13.0	0.45	0
3	CLE	H vs CAR	21–18	+2.5	cover	276	132	+2.1	+0.2	-7.7	0.38	1

Last game EPA (PBP): PIT off +11.3, def allowed +14.8, net -3.6, SR 0.49. CLE off +0.2, def allowed -7.7, net +7.9, SR 0.38. Records: PIT 2–1, CLE 2–1. ATS: PIT 2–1, CLE 2–1.

2. Lookahead and rest

- PIT: last played week 3 (Sunday early window, home, won by 3). 4 days rest. Week 5: home vs IND, non-division, Sunday early window.
- CLE: last played week 3 (Sunday early window, home, won by 3). 4 days rest. Week 5: road vs NYJ, non-division, Sunday early window.

3. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to CLE
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: applies to CLE, PIT
- trip ≥ 1000 mi: no
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Both chairs resolve to the same games (mirror). Printed once; PIT’s record is the complement.

- **CLE +2.5** — one population: Thursday night dog +1 to +3; outdoors. Not added (no gap with $n \geq 20$ left): short week (≤ 5 days rest), equal rest, host of a short-trip visitor (< 200 mi), off a win, off a 1-score win, off a cover, off an upset win as dog, off a home game....
- **Walk-forward 2–6 (25.0%, n=8)** — picked on seasons before N, printed on N, 2019–25. By year: 19:1-1 20:0-0 21:0-1 22:0-1 23:0-1 24:1-1 25:0-1. OOS cover margin median -5.2, $P(>+7)$ 0.12, $P(<-7)$ 0.38. Traits picked in ≥ 4 of 7 folds: Thursday night home dog +1 to +3 (4/7).
- Full-window stack (picked on all seasons): Thursday night dog +1 to +3; outdoors. ATS 9–10–1 (47.4%, n=20).
- By season: 15:0-0 16:1-1 17:3-1 18:1-1 19:1-1 20:2-0 21:0-2 22:1-2 23:0-1 24:0-1
- Cover margin: median -0.5, q25/q75 -7.6/+8.4; $P(>+7)$ 0.30, $P(<-7)$ 0.25
- Parent minus child: without 'outdoors': 12–15–1 (44.4%, n=28), the games it removed: 3–5 (37.5%, n=8)
- Anchor alone 12–15–1 (44.4%, n=28); anchor minus stack 3–5 (37.5%, n=8)
- Stack by line bucket: +1 to +3 9–10–1 (47.4%, n=20)

- Contrary cross: success rate $\leq .40$ last: 3–7 (30.0%, n=10) → in stack 3–4 (42.9%, n=7) | off a cover: 4–7–1 (36.4%, n=12) → in stack 3–5–1 (37.5%, n=9) | off a win: 4–6–1 (40.0%, n=11) → in stack 2–5–1 (28.6%, n=8) | equal rest: 12–15–1 (44.4%, n=28) → in stack 9–10–1 (47.4%, n=20)
- **PIT –2.5** — mirror of the above: walk-forward 10–9–1 (52.6%, n=20).
- **Total 38.5** — tightest full-window cut clearing n = 20: division game, total ≤ 42 — O–U 21–36 (36.8%, n=57).
- By season (O–U): 15:2-3 16:1-2 17:4-7 18:1-3 19:0-2 20:2-0 21:0-1 22:3-5 23:1-6 24:6-5 25:1-2
- Total margin (points – line): median -5.0, q25/q75 -9.5/+5.5; P(>+7) 0.18, P(<-7) 0.37
- **Walk-forward 19–16 in the training cut's direction (54.3%, n=35; raw O–U 16–19)** — cut chosen on seasons before N, printed on N; O/U after each year is the direction the training cut pointed. By year: 19:5-5U 20:2-0U 21:3-2U 22:3-5U 23:2-6U 24:1-1U 25:0-0U. OOS total margin median -2.5. Cuts picked: home dog, total ≤ 42 (2/7), division game, home dog, total ≤ 40 (2/7), division game, home dog (1/7), division game, total ≤ 42 (1/7), line within 3, total ≤ 39 (1/7).
- By total band: ≤ 39 2–9 (n=11); 40–44 19–24 (n=43)

Appendix A. Sides — CLE +2.5

CLE (home dog)

Spot anchors (nested — the same games appear in more than one row; identical populations are collapsed below):

Last game EPA (PBP): IND off -8.1, def allowed -4.5, net -3.6, SR 0.41. WAS off -1.6, def allowed -1.7, net +0.1, SR 0.33. Records: IND 1–2, WAS 1–2. ATS: IND 2–1, WAS 2–1.

2. Lookahead and rest

- IND: last played week 3 (Sunday early window, home, won by 2). 7 days rest. Week 5: road vs PIT, non-division, Sunday early window.
- WAS: last played week 3 (Sunday early window, home, won by 2). 7 days rest. Week 5: home vs NYG, division, Sunday early window.

3. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: no
- TO ≥ 3 last: applies to IND
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Chairs are built on different conditioning sets — read the second as a cross-check on the first, not a second sample.

- **WAS +3.5** — one population: dog +3.5 to +6.5 (all sites); 0 turnovers last; outdoors; off a cover; off a win; equal rest. Not added (no gap with $n \geq 20$ left): off a 1-score win, off an upset win as dog, scored 27–33 last, scored ≥ 30 last, allowed ≥ 27 last, allowed ≥ 30 last, off yards ≤ 300 last, TO ≤ 1 last....
- **Walk-forward 7–3 (70.0%, n=10)** — picked on seasons before N, printed on N, 2019–25. By year: 19:0-0 20:2-0 21:2-0 22:0-1 23:1-2 24:1-0 25:1-0. OOS cover margin median +6.0, $P(>+7)$ 0.40, $P(<-7)$ 0.20. Traits picked in ≥ 4 of 7 folds: dog +3.5 to +6.5 (all sites) (7/7), 0 turnovers last (5/7), equal rest (4/7).
- Full-window stack (picked on all seasons): dog +3.5 to +6.5 (all sites); 0 turnovers last; outdoors; off a cover; off a win; equal rest. ATS 8–16 (33.3%, n=24).
- By season: 15:1-4 16:0-1 17:0-1 18:0-2 20:1-0 21:1-1 22:1-4 23:1-2 24:2-0 25:1-1
- Cover margin: median -3.5, q25/q75 -11.9/+0.5; $P(>+7)$ 0.12, $P(<-7)$ 0.42

- Parent minus child: without '0 turnovers last': 24–30–1 (44.4%, n=55), the games it removed: 16–14–1 (53.3%, n=31) | without 'outdoors': 10–20 (33.3%, n=30), the games it removed: 2–4 (33.3%, n=6) | without 'off a cover': 8–18 (30.8%, n=26), the games it removed: 0–2 (0.0%, n=2) | without 'off a win': 11–17 (39.3%, n=28), the games it removed: 3–1 (75.0%, n=4) | without 'equal rest': 14–23 (37.8%, n=37), the games it removed: 6–7 (46.2%, n=13)
- Anchor alone 154–154–2 (50.0%, n=310); anchor minus stack 146–138–2 (51.4%, n=286)
- Stack by line bucket: +3.5 to +6.5 8–16 (33.3%, n=24)
- Contrary cross: both off a win: 40–53–2 (43.0%, n=95) → in stack 7–11 (38.9%, n=18) | off a 1-score win: 35–40–2 (46.7%, n=77) → in stack 5–7 (41.7%, n=12) | opponent off a win: 85–91–2 (48.3%, n=178) → in stack 7–11 (38.9%, n=18) | next game is division: 44–48 (47.8%, n=92) → in stack 2–7 (22.2%, n=9)
- **IND –3.5** — one population: fav –3.5 to –6.5 (all sites); off an upset win as dog; off a 1-score win. Not added (no gap with n ≥ 20 left): equal rest, off a win, off a cover, off a division game, scored ≤21 last, allowed ≤17 last, allowed ≤21 last, TO ≥3 last....
- **Walk-forward 7–5 (58.3%, n=12)** — picked on seasons before N, printed on N, 2019–25. By year: 19:0-1 20:3-1 21:2-1 22:0-1 23:1-0 24:0-0 25:1-1. OOS cover margin median +2.2, P(>+7) 0.25, P(<-7) 0.25. Traits picked in ≥4 of 7 folds: fav –3.5 to –6.5 (all sites) (7/7), off an upset win as dog (7/7).
- Full-window stack (picked on all seasons): fav –3.5 to –6.5 (all sites); off an upset win as dog; off a 1-score win. ATS 18–8 (69.2%, n=26).

2. Lookahead and rest

- TEN: last played week 3 (Sunday early window, road, lost by 5). 7 days rest. Week 5: home vs HOU, division, Sunday early window.
- BAL: last played week 3 (Sunday late window, neutral site, won by 3). 7 days rest. Week 5: road vs ATL, non-division, Sunday night.

3. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to TEN
- bye next week: no
- off a bye: no
- scored ≤ 10 last: applies to TEN
- short week: no
- trip ≥ 1000 mi: no
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Chairs are built on different conditioning sets — read the second as a cross-check on the first, not a second sample.

- BAL -11.5** — one population: Sunday early window home fav -10 or more; outdoors; opponent off a loss. Not added (no gap with $n \geq 20$ left): equal rest, off a win, off a 1-score win, off a win as favorite, off a neutral-site game, scored ≥ 30 last, allowed ≥ 27 last, allowed ≥ 30 last....
- Walk-forward 10–8–1 (55.6%, n=19)** — picked on seasons before N, printed on N, 2019–25. By year: 19:3-2 20:2-2 21:3-1-1 22:0-1 23:0-0 24:0-0 25:2-2. OOS cover margin median +4.5, $P(>+7)$ 0.42, $P(<-7)$ 0.21. Traits picked in ≥ 4 of 7 folds: Sunday early window home fav -10 or more (7/7).
- Full-window stack (picked on all seasons): Sunday early window home fav -10 or more; outdoors; opponent off a loss. ATS 14–8–1 (63.6%, n=23).
- By season: 16:2-0 17:1-2 19:2-2 20:1-2 21:3-0 22:2-0 23:3-0 25:0-2
- Cover margin: median +4.5, q25/q75 -5.8/+11.0; $P(>+7)$ 0.39, $P(<-7)$ 0.22
- Parent minus child: without 'outdoors': 15–10–1 (60.0%, n=26), the games it removed: 1–2 (33.3%, n=3) | without 'opponent off a loss': 18–10–1 (64.3%, n=29), the games it removed: 4–2 (66.7%, n=6)

- Anchor alone 21–15–2 (58.3%, n=38); anchor minus stack 7–7–1 (50.0%, n=15)
- Stack by line bucket: -10 or more 14–8–1 (63.6%, n=23)
- Contrary cross: no trait the team carries runs under 50% on this anchor at $n \geq 10$.
- **TEN +11.5** — one population: Sunday early window road dog +10 or more; outdoors; next opponent is a favorite over them ($n_{line} > 0$). Not added (no gap with $n \geq 20$ left): equal rest, trip 200–1000 mi, 1 time zone, off a loss, off a 1-score loss, off an ATS miss, off a loss as dog, off a road game....
- **Walk-forward 7–7 (50.0%, n=14)** — picked on seasons before N, printed on N, 2019–25. By year: 19:2-3 20:2-1 21:1-2 22:0-1 23:0-0 24:0-0 25:2-0. OOS cover margin median -0.5, $P(>+7)$ 0.29, $P(<-7)$ 0.36. Traits picked in ≥ 4 of 7 folds: Sunday early window road dog +10 or more (7/7), outdoors (4/7).
- Full-window stack (picked on all seasons): Sunday early window road dog +10 or more; outdoors; next opponent is a favorite over them ($n_{line} > 0$). ATS 8–15 (34.8%, n=23).
- By season: 15:1-1 16:0-2 17:2-1 19:2-1 20:2-2 21:0-2 22:1-2 23:0-3 25:0-1

2. Lookahead and rest

- NE: last played week 3 (Sunday early window, road, lost by 29). 7 days rest. Week 5: home vs LV, non-division, Sunday early window.
- BUF: last played week 3 (Sunday early window, home, won by 8). 7 days rest. Week 5: road vs LA, non-division, Monday night.

3. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: applies to NE
- off a 20-point win: no
- 2nd straight home game: applies to BUF
- 2nd straight road game: applies to NE
- bye next week: no
- off a bye: no
- scored ≤ 10 last: applies to NE
- short week: no
- trip ≥ 1000 mi: no
- TO ≥ 3 last: applies to BUF, NE
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Both chairs resolve to the same games (mirror). Printed once; NE's record is the complement.

- BUF -7.0** — one population: division home fav -7 to -9.5; off a win. Not added (no gap with $n \geq 20$ left): equal rest, off a 1-score win, off a cover, off a win as favorite, off a home game, 2nd straight home game, allowed ≤ 17 last, allowed ≤ 21 last....
- Walk-forward 4–5–1 (44.4%, n=10)** — picked on seasons before N, printed on N, 2019–25. By year: 19:0-1 20:1-2 21:1-0 22:0-2 23:1-0-1 24:0-0 25:1-0. OOS cover margin median -2.0, P(>+7) 0.30, P(<-7) 0.20. Traits picked in ≥ 4 of 7 folds: division home fav -7 to -9.5 (7/7).
- Full-window stack (picked on all seasons): division home fav -7 to -9.5; off a win. ATS 8–11–2 (42.1%, n=21).
- By season: 15:2-2 17:2-0 18:1-1 20:1-1 21:1-1 22:0-1 23:0-1 24:0-1 25:1-3
- Cover margin: median -1.5, q25/q75 -9.0/+13.0; P(>+7) 0.33, P(<-7) 0.33
- Parent minus child: without 'off a win': 16–14–2 (53.3%, n=32), the games it removed: 8–3 (72.7%, n=11)
- Anchor alone 16–14–2 (53.3%, n=32); anchor minus stack 8–3 (72.7%, n=11)
- Stack by line bucket: -7 to -9.5 8–11–2 (42.1%, n=21)

- Contrary cross: off a win, opponent off a loss: 5–8–1 (38.5%, n=14) → in stack 5–8–1 (38.5%, n=14) | off a win as favorite: 6–9–1 (40.0%, n=16) → in stack 6–9–1 (40.0%, n=16) | off a cover: 6–8–1 (42.9%, n=15) → in stack 6–8–1 (42.9%, n=15) | allowed ≤21 last: 7–8 (46.7%, n=15) → in stack 4–8 (33.3%, n=12)
- **NE +7.0** — mirror of the above: walk-forward 7–11–1 (38.9%, n=19).
- **Total 48.5** — tightest full-window cut clearing n = 20: home fav –7 or more, both off EPA ≤ –1 last — O–U 12–23 (34.3%, n=35).
- By season (O–U): 15:1–1 16:0–2 17:3–3 18:1–2 19:1–1 20:2–0 21:1–1 22:1–3 23:0–4 24:0–2 25:2–4
- Total margin (points – line): median -4.5, q25/q75 -10.8/+2.8; P(>+7) 0.17, P(<-7) 0.40
- **Walk-forward 4–7 in the training cut's direction (36.4%, n=11; raw O–U 3–8)** — cut chosen on seasons before N, printed on N; O/U after each year is the direction the training cut pointed. By year: 19:2–1O 20:0–4O 21:1–2O 22:0–0U 23:0–1U 24:0–0U 25:0–0U. OOS total margin median -7.0. Cuts picked: home fav –7 or more, both teams went under last week, total 45–49 (4/7), outdoors, home fav –7 or more, total 45–49 (2/7), both off EPA ≤ –1 last, total ≥47 (1/7).
- By total band: ≤39 0–3 (n=3); 40–44 8–9 (n=17); 45–49 3–8 (n=11); ≥50 1–2 (n=3)

Last game EPA (PBP): NYJ off +7.1, def allowed +12.6, net -5.5, SR 0.45. CHI off +9.4, def allowed -13.9, net +23.3, SR 0.51. Records: NYJ 1–2, CHI 2–1. ATS: NYJ 2–0, CHI 2–1.

2. Lookahead and rest

- NYJ: last played week 3 (Sunday early window, road, lost by 7). 7 days rest. Week 5: home vs CLE, non-division, Sunday early window.
- CHI: last played week 3 (Monday night, home, won by 20). 6 days rest. Week 5: road vs GB, division, Sunday early window.

3. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: applies to CHI
- 2nd straight home game: applies to CHI
- 2nd straight road game: applies to NYJ
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: no
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Chairs are built on different conditioning sets — read the second as a cross-check on the first, not a second sample.

- **CHI -3.5** — one population: Sunday early window home fav -3.5 to -6.5; off an upset win as dog. Not added (no gap with $n \geq 20$ left): off a win, off a win by 14+, off a win by 20+, off a cover, off a prime-time game, off a home game, 2nd straight home game, scored 27–33 last....
- **Walk-forward 3–4 (42.9%, n=7)** — picked on seasons before N, printed on N, 2019–25. By year: 19:1-2 20:0-1 21:0-0 22:0-1 23:1-0 24:0-0 25:1-0. OOS cover margin median -1.0, $P(>+7)$ 0.29, $P(<-7)$ 0.43. Traits picked in ≥ 4 of 7 folds: Sunday early window home fav -3.5 to -6.5 (7/7), off an upset win as dog (6/7), allowed ≤ 21 last (5/7).
- Full-window stack (picked on all seasons): Sunday early window home fav -3.5 to -6.5; off an upset win as dog. ATS 14–6 (70.0%, n=20).
- By season: 15:3-1 16:1-0 17:2-1 18:2-0 19:1-2 20:2-0 22:0-1 23:1-0 25:2-1

2. Lookahead and rest

- DAL: last played week 3 (Sunday late window, neutral site, lost by 3). 7 days rest. Week 5: home vs TB, non-division, Thursday night.
- HOU: last played week 3 (Sunday early window, road, lost by 2). 7 days rest. Week 5: road vs TEN, division, Sunday early window.

3. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: no
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Chairs are built on different conditioning sets — read the second as a cross-check on the first, not a second sample.

- HOU -3.0** — one population: Sunday early window home fav -1 to -3; off a 1-score loss; off a road game. Not added (no gap with $n \geq 20$ left): equal rest, off a loss, off an ATS miss, off a loss as favorite, off a division game, scored ≤ 17 last, scored ≤ 21 last, allowed ≤ 21 last....
- Walk-forward 4–8 (33.3%, n=12)** — picked on seasons before N, printed on N, 2019–25. By year: 19:1-1 20:1-1 21:0-3 22:2-2 23:0-0 24:0-0 25:0-1. OOS cover margin median -5.8, $P(>+7)$ 0.08, $P(<-7)$ 0.42. Traits picked in ≥ 4 of 7 folds: Sunday early window home fav -1 to -3 (7/7), off a 1-score loss (6/7), equal rest (4/7), next game is road (4/7).
- Full-window stack (picked on all seasons): Sunday early window home fav -1 to -3; off a 1-score loss; off a road game. ATS 6–13–1 (31.6%, n=20).
- By season: 15:0-1 16:1-1 17:0-2 18:1-0 19:0-1 20:1-1 21:0-3 22:1-2 23:0-1 24:1-0 25:1-1
- Cover margin: median -4.5, q25/q75 -10.2/+4.0; $P(>+7)$ 0.15, $P(<-7)$ 0.40
- Parent minus child: without 'off a 1-score loss': 30–39–5 (43.5%, n=74), the games it removed: 24–26–4 (48.0%, n=54) | without 'off a road game': 7–18–1 (28.0%, n=26), the games it removed: 1–5 (16.7%, n=6)
- Anchor alone 44–57–6 (43.6%, n=107); anchor minus stack 38–44–5 (46.3%, n=87)

- Stack by line bucket: -1 to -3 6–13–1 (31.6%, n=20)
- Contrary cross: equal rest: 20–36–3 (35.7%, n=59) → in stack 3–9 (25.0%, n=12) | off a loss: 17–31–2 (35.4%, n=50) → in stack 6–13–1 (31.6%, n=20) | both off a loss: 9–19–1 (32.1%, n=29) → in stack 3–10–1 (23.1%, n=14) | off an ATS miss: 17–28–3 (37.8%, n=48) → in stack 3–8–1 (27.3%, n=12)
- DAL +3.0** — one population: Sunday early window road dog +1 to +3; trip 200–1000 mi; opponent off an ATS miss; opponent off a loss. Not added (no gap with n ≥ 20 left): equal rest, 0 time zones, off a loss, off a 1-score loss, off a loss as dog, off a neutral-site game, scored 27–33 last, scored ≥30 last...
- Walk-forward 7–6 (53.8%, n=13)** — picked on seasons before N, printed on N, 2019–25. By year: 19:2-2 20:2-0 21:1-1 22:1-0 23:0-1 24:0-1 25:1-1. OOS cover margin median +2.0, P(>+7) 0.31, P(<-7) 0.15. Traits picked in ≥4 of 7 folds: Sunday early window road dog +1 to +3 (7/7).
- Full-window stack (picked on all seasons): Sunday early window road dog +1 to +3; trip 200–1000 mi; opponent off an ATS miss; opponent off a loss. ATS 20–5–1 (80.0%, n=26).

2. Lookahead and rest

- ARI: last played week 3 (Sunday late window, road, lost by 6). 7 days rest. Week 5: home vs DET, non-division, Sunday late window.
- NYG: last played week 3 (Sunday early window, home, won by 5). 7 days rest. Week 5: road vs WAS, division, Sunday early window.

3. What does not apply

- 2+ time-zone trip: applies to ARI
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to NYG
- 2nd straight road game: applies to ARI
- bye next week: no
- off a bye: no
- scored ≤10 last: no
- short week: no
- trip ≥1000 mi: applies to ARI
- TO ≥3 last: no
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at n ≥ 10, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at n ≥ 20) and its diagnostics sit in the block below it. Same gate on every slot.

Chairs are built on different conditioning sets — read the second as a cross-check on the first, not a second sample.

- **NYG +2.5** — one population: Sunday early window home dog +1 to +3; off EPA ≤ -1 last; opponent off a cover. Not added (no gap with n ≥ 20 left): equal rest, host of a 2+ zone visitor, host of a ≥1000 mi visitor, off a win, off a 1-score win, off a cover, off a win as favorite, off a home game....
- **Walk-forward 4–6–2 (40.0%, n=12)** — picked on seasons before N, printed on N, 2019–25. By year: 19:0-0 20:2-1 21:0-3 22:1-1-1 23:1-0-1 24:0-1 25:0-0. OOS cover margin median -0.5, P(>+7) 0.33, P(<-7) 0.08. Traits picked in ≥4 of 7 folds: Sunday early window home dog +1 to +3 (7/7).
- Full-window stack (picked on all seasons): Sunday early window home dog +1 to +3; off EPA ≤ -1 last; opponent off a cover. ATS 15–4–2 (78.9%, n=21).
- By season: 15:2-0 16:1-1 17:2-1 18:1-0 21:1-0 22:0-1 23:5-0 24:2-0 25:1-1
- Cover margin: median +5.5, q25/q75 +0.0/+10.0; P(>+7) 0.38, P(<-7) 0.10
- Parent minus child: without 'off EPA ≤ -1 last': 25–19–2 (56.8%, n=46), the games it removed: 10–15 (40.0%, n=25) | without 'opponent off a cover': 28–15–3 (65.1%, n=46), the games it removed: 13–11–1 (54.2%, n=25)

- Anchor alone 43–47–4 (47.8%, n=94); anchor minus stack 28–43–2 (39.4%, n=73)
- Stack by line bucket: +1 to +3 15–4–2 (78.9%, n=21)
- Contrary cross: TO ≤1 last: 20–28–1 (41.7%, n=49) → in stack 8–1–1 (88.9%, n=10) | opponent off a loss: 16–23–2 (41.0%, n=41) → in stack 1–0 (100.0%, n=1) | off a win as favorite: 5–8–1 (38.5%, n=14) → in stack 2–0 (100.0%, n=2) | 2nd straight home game: 10–14–1 (41.7%, n=25) → in stack 3–1–1 (75.0%, n=5)
- **ARI –2.5** — one population: Sunday early window road fav –1 to –3; allowed ≥30 last. Not added (no gap with n ≥ 20 left): equal rest, trip ≥1000 mi, trip ≥2000 mi, 2+ time zones, west team east, early kick, off a loss, off a 1-score loss, off a cover....
- **Walk-forward 8–3 (72.7%, n=11)** — picked on seasons before N, printed on N, 2019–25. By year: 19:0-0 20:1-0 21:3-0 22:2-2 23:1-1 24:1-0 25:0-0. OOS cover margin median +1.0, P(>+7) 0.27, P(<-7) 0.27. Traits picked in ≥4 of 7 folds: Sunday early window road fav –1 to –3 (7/7).
- Full-window stack (picked on all seasons): Sunday early window road fav –1 to –3; allowed ≥30 last. ATS 14–5–1 (73.7%, n=20).
- By season: 16:0-1 17:0-1 18:1-1 20:3-1 21:2-1 22:2-0 23:1-0 24:2-0 25:3-0
- Cover margin: median +3.0, q25/q75 -1.5/+6.1; P(>+7) 0.20, P(<-7) 0.15
- Parent minus child: without 'allowed ≥30 last': 47–43–4 (52.2%, n=94), the games it removed: 33–38–3 (46.5%, n=74)
- Anchor alone 47–43–4 (52.2%, n=94); anchor minus stack 33–38–3 (46.5%, n=74)
- Stack by line bucket: -1 to -3 14–5–1 (73.7%, n=20)
- Contrary cross: off a cover: 19–25–2 (43.2%, n=46) → in stack 0–1 (0.0%, n=1) | 2nd straight road game: 13–18–2 (41.9%, n=33) → in stack 5–2–1 (71.4%, n=8) | off a road game: 13–18–2 (41.9%, n=33) → in stack 5–2–1 (71.4%, n=8) | 0 turnovers last: 9–13–1 (40.9%, n=23) → in stack 0–0 (—, n=0)
- **Total 44.5** — tightest full-window cut clearing n = 20: line within 3, visitor crossing 2+ zones — O–U 52–40–1 (56.5%, n=93).
- By season (O–U): 15:3-2 16:7-4 17:9-0 18:4-1 19:6-2 20:2-3 21:5-4 22:3-7 23:4-7 24:2-6 25:7-4
- Total margin (points – line): median +1.5, q25/q75 -5.0/+7.0; P(>+7) 0.25, P(<-7) 0.22
- **Walk-forward 35–56 in the training cut's direction (38.5%, n=92; raw O–U 53–38–1)** — cut chosen on seasons before N, printed on N; O/U after each year is the direction the training cut pointed. By year: 19:6-20 20:2-3-10 21:5-40 22:3-70 23:4-70 24:16-9U 25:17-6U. OOS total margin median +2.8. Cuts picked: line within 3, visitor crossing 2+ zones (5/7), outdoors, home dog (2/7).
- By total band: ≤39 2–3 (n=5); 40–44 20–14 (n=34); 45–49 26–18 (n=44); ≥50 4–5–1 (n=10)

Last game EPA (PBP): LA off -0.0, def allowed +2.4, net -2.4, SR 0.40. PHI off -13.9, def allowed +9.4, net -23.3, SR 0.40. Records: LA 1–2, PHI 2–1. ATS: LA 1–2, PHI 0–3.

2. Lookahead and rest

- LA: last played week 3 (Sunday night, road, lost by 4). 7 days rest. Week 5: home vs BUF, non-division, Monday night.
- PHI: last played week 3 (Monday night, road, lost by 20). 6 days rest. Week 5: road vs JAX, non-division, Sunday early window.

3. What does not apply

- 2+ time-zone trip: applies to LA
- double-digit dog: no
- off a 10-point loss: applies to PHI
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to LA
- bye next week: no
- off a bye: no
- scored ≤ 10 last: applies to PHI
- short week: no
- trip ≥ 1000 mi: applies to LA
- TO ≥ 3 last: applies to PHI
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Chairs are built on different conditioning sets — read the second as a cross-check on the first, not a second sample.

- PHI +3.5** — one population: Sunday early window home dog +3.5 to +6.5; outdoors; allowed ≥ 27 last. Not added (no gap with $n \geq 20$ left): host of a 2+ zone visitor, host of a ≥ 1000 mi visitor, off a loss, off a loss by 10+, off a loss by 20+, off an ATS miss, off a loss as favorite, off a prime-time game....
- Walk-forward 11–8 (57.9%, n=19)** — picked on seasons before N, printed on N, 2019–25. By year: 19:4-2 20:1-1 21:1-3 22:2-0 23:1-1 24:1-1 25:1-0. OOS cover margin median +0.5, $P(>+7)$ 0.32, $P(<-7)$ 0.16. Traits picked in ≥ 4 of 7 folds: Sunday early window home dog +3.5 to +6.5 (7/7), next game is road non-division (5/7).
- Full-window stack (picked on all seasons): Sunday early window home dog +3.5 to +6.5; outdoors; allowed ≥ 27 last. ATS 14–7 (66.7%, n=21).
- By season: 15:2-0 16:0-1 17:2-1 18:0-1 19:3-0 20:1-0 21:1-2 22:1-0 23:2-1 25:2-1

2. Lookahead and rest

- KC: last played week 3 (Sunday early window, road, won by 14). 7 days rest. Week 5: bye.
- LV: last played week 3 (Sunday late window, road, won by 8). 7 days rest. Week 5: road vs NE, non-division, Sunday early window.

3. What does not apply

- 2+ time-zone trip: applies to KC
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to KC
- bye next week: applies to KC
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: applies to KC
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Both chairs resolve to the same games (mirror). Printed once; KC's record is the complement.

- **LV +4.5** — one population: Sunday late window division home dog. Not added (no gap with $n \geq 20$ left): equal rest, host of a 2+ zone visitor, host of a ≥ 1000 mi visitor, off a win, off a 1-score win, off a cover, off an upset win as dog, off a road game....
- **Walk-forward 6–6 (50.0%, n=12)** — picked on seasons before N, printed on N, 2019–25. By year: 19:1-1 20:1-2 21:1-0 22:1-2 23:1-0 24:1-1 25:0-0. OOS cover margin median -1.0, $P(>+7)$ 0.33, $P(<-7)$ 0.33. Traits picked in ≥ 4 of 7 folds: Sunday late window division home dog (7/7).
- Full-window stack (picked on all seasons): Sunday late window division home dog. ATS 12–15 (44.4%, n=27).
- By season: 15:0-1 16:0-1 17:1-2 18:4-1 19:1-1 20:1-2 21:1-0 22:1-2 23:1-0 24:2-4 25:0-1
- Cover margin: median -4.0, q25/q75 -11.2/+5.0; $P(>+7)$ 0.19, $P(<-7)$ 0.37
- Anchor alone 12–15 (44.4%, n=27); anchor minus stack 0–0 (—, n=0)
- Stack by line bucket: +1 to +3 6–9 (40.0%, n=15); +3.5 to +6.5 2–4 (33.3%, n=6); +7 to +9.5 4–2 (66.7%, n=6)
- Contrary cross: allowed ≥ 27 last: 3–10 (23.1%, n=13) → in stack 3–10 (23.1%, n=13) | next opponent is a favorite over them ($n_{line}>0$): 7–12 (36.8%, n=19) → in stack 7–12 (36.8%, n=19) | off a road game: 7–10 (41.2%, n=17) → in stack 7–10 (41.2%, n=17) | next game is

road: 11–12 (47.8%, n=23) → in stack 11–12 (47.8%, n=23)

- **KC -4.5** — mirror of the above: walk-forward 5–5 (50.0%, n=10).
- **Total 47.5** — tightest full-window cut clearing n = 20: Sunday late window, visitor crossing 2+ zones, total 45–49 — O–U 24–13 (64.9%, n=37).
- By season (O–U): 15:2-1 16:3-1 17:4-0 19:1-1 20:2-1 21:4-2 22:2-1 23:1-1 24:1-3 25:4-2
- Total margin (points – line): median +2.5, q25/q75 -3.0/+13.0; P(>+7) 0.32, P(<-7) 0.19
- **Walk-forward 25–28 in the training cut's direction (47.2%, n=53; raw O–U 26–27)** — cut chosen on seasons before N, printed on N; O/U after each year is the direction the training cut pointed. By year: 19:12-12O 20:5-5U 21:5-5O 22:1-1O 23:1-1O 24:1-3O 25:1-0U. OOS total margin median -0.5. Cuts picked: Sunday late window, visitor crossing 2+ zones, total 45–49 (2/7), visitor crossing 2+ zones (1/7), both off +8 off EPA, total ≥47 (1/7), Sunday late window, visitor crossing 2+ zones (1/7), Sunday late window, visitor crossing 2+ zones, total ≥47 (1/7), both off +8 off EPA, visitor crossing 2+ zones (1/7).
- By total band: 45–49 24–13 (n=37)

2. Lookahead and rest

- DEN: last played week 3 (Sunday night, home, won by 4). 7 days rest. Week 5: road vs LAC, division, Sunday late window.
- SF: last played week 3 (Sunday late window, home, won by 6). 7 days rest. Week 5: road vs SEA, division, Sunday late window.

3. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to SF
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: no
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Chairs are built on different conditioning sets — read the second as a cross-check on the first, not a second sample.

- SF -3.0** — one population: Sunday late window home fav -1 to -3; outdoors; next opponent is a favorite over them ($n_{line} > 0$). Not added (no gap with $n \geq 20$ left): equal rest, off a win, off a 1-score win, off an ATS miss, off a win as favorite, off a home game, 2nd straight home game, off a division game....
- Walk-forward 6–6 (50.0%, n=12)** — picked on seasons before N, printed on N, 2019–25. By year: 19:2-1 20:1-1 21:1-0 22:0-2 23:0-1 24:2-1 25:0-0. OOS cover margin median -1.2, $P(>+7)$ 0.25, $P(<-7)$ 0.33. Traits picked in ≥ 4 of 7 folds: Sunday late window home fav -1 to -3 (7/7).
- Full-window stack (picked on all seasons): Sunday late window home fav -1 to -3; outdoors; next opponent is a favorite over them ($n_{line} > 0$). ATS 8–14 (36.4%, n=22).
- By season: 15:1-0 16:0-1 17:0-4 18:1-3 19:2-1 20:1-1 21:0-1 22:1-2 23:1-1 24:1-0
- Cover margin: median -3.8, q25/q75 -10.6/+3.1; $P(>+7)$ 0.18, $P(<-7)$ 0.41
- Parent minus child: without 'outdoors': 14–16 (46.7%, n=30), the games it removed: 6–2 (75.0%, n=8) | without 'next opponent is a favorite over them ($n_{line} > 0$)': 10–22–2 (31.2%, n=34), the games it removed: 2–8–2 (20.0%, n=12)

- Anchor alone 18–28–2 (39.1%, n=48); anchor minus stack 10–14–2 (41.7%, n=26)
