3	SF	H vs ARI	36–30	-7.5	miss	437	140	+22.9	+24.1	+12.5	0.57	1

Last game EPA (PBP): DEN off +2.4, def allowed -0.0, net +2.4, SR 0.40. SF off +24.1, def allowed +12.5, net +11.6, SR 0.57. Records: DEN 2–1, SF 3–0. ATS: DEN 2–1, SF 2–1.

2. Lookahead and rest

- DEN: last played week 3 (Sunday night, home, won by 4). 7 days rest. Week 5: road vs LAC, division, Sunday late window.
- SF: last played week 3 (Sunday late window, home, won by 6). 7 days rest. Week 5: road vs SEA, division, Sunday late window.

3. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to SF
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: no
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Chairs are built on different conditioning sets — read the second as a cross-check on the first, not a second sample.

- SF -3.0** — one population: Sunday late window home fav -1 to -3; outdoors; next opponent is a favorite over them ($n_{\text{line}} > 0$). Not added (no gap with $n \geq 20$ left): equal rest, off a win, off a 1-score win, off an ATS miss, off a win as favorite, off a home game, 2nd straight home game, off a division game...
- Walk-forward 6–6 (50.0%, $n=12$)** — picked on seasons before N, printed on N, 2019–25. By year: 19:2-1 20:1-1 21:1-0 22:0-2 23:0-1 24:2-1 25:0-0. OOS cover margin median -1.2, $P(>+7)$ 0.25, $P(<-7)$ 0.33. Traits picked in ≥ 4 of 7 folds: Sunday late window home fav -1 to -3 (7/7).
- Full-window stack (picked on all seasons): Sunday late window home fav -1 to -3; outdoors; next opponent is a favorite over them ($n_{\text{line}} > 0$). ATS 8–14 (36.4%, $n=22$).
- By season: 15:1-0 16:0-1 17:0-4 18:1-3 19:2-1 20:1-1 21:0-1 22:1-2 23:1-1 24:1-0
- Cover margin: median -3.8, q_{25}/q_{75} -10.6/+3.1; $P(>+7)$ 0.18, $P(<-7)$ 0.41

- Parent minus child: without 'outdoors': 14–16 (46.7%, n=30), the games it removed: 6–2 (75.0%, n=8) | without 'next opponent is a favorite over them (n_line>0)': 10–22–2 (31.2%, n=34), the games it removed: 2–8–2 (20.0%, n=12)
- Anchor alone 18–28–2 (39.1%, n=48); anchor minus stack 10–14–2 (41.7%, n=26)
- Stack by line bucket: -1 to -3 8–14 (36.4%, n=22)
- Contrary cross: allowed ≥30 last: 3–12 (20.0%, n=15) → in stack 1–7 (12.5%, n=8) | equal rest: 8–19–1 (29.6%, n=28) → in stack 5–10 (33.3%, n=15) | allowed ≥27 last: 7–17–1 (29.2%, n=25) → in stack 4–10 (28.6%, n=14) | off an ATS miss: 7–16–2 (30.4%, n=25) → in stack 3–8 (27.3%, n=11)
- **DEN +3.0** — one population: Sunday late window road dog +1 to +3; TO ≤1 last; off a home game. Not added (no gap with n ≥ 20 left): equal rest, trip 200–1000 mi, 1 time zone, off a win, off a 1-score win, off a cover, off a win as favorite, off a prime-time game....
- **Walk-forward 3–8 (27.3%, n=11)** — picked on seasons before N, printed on N, 2019–25. By year: 19:1-0 20:0-2 21:0-1 22:2-1 23:0-3 24:0-1 25:0-0. OOS cover margin median -8.0, P(>+7) 0.27, P(<-7) 0.55. Traits picked in ≥4 of 7 folds: Sunday late window road dog +1 to +3 (7/7).
- Full-window stack (picked on all seasons): Sunday late window road dog +1 to +3; TO ≤1 last; off a home game. ATS 18–6–1 (75.0%, n=25).
- By season: 16:1-0 17:2-0 18:3-1 19:3-1 20:1-0 21:1-1 22:3-1 23:1-1 24:1-1 25:2-0
- Cover margin: median +4.0, q25/q75 +0.0/+12.5; P(>+7) 0.40, P(<-7) 0.16
- Parent minus child: without 'TO ≤1 last': 21–11–2 (65.6%, n=34), the games it removed: 3–5–1 (37.5%, n=9) | without 'off a home game': 24–11–1 (68.6%, n=36), the games it removed: 6–5 (54.5%, n=11)
- Anchor alone 28–18–2 (60.9%, n=48); anchor minus stack 10–12–1 (45.5%, n=23)
- Stack by line bucket: +1 to +3 18–6–1 (75.0%, n=25)
- Contrary cross: off yards ≤300 last: 4–10–1 (28.6%, n=15) → in stack 4–5–1 (44.4%, n=10) | 1 time zone: 5–8 (38.5%, n=13) → in stack 5–3 (62.5%, n=8)
- **Total 47.5** — tightest full-window cut clearing n = 20: both teams went over last week, both off a 55+ point game, total ≥47 — O–U 12–22–1 (35.3%, n=35).
- By season (O–U): 15:0-1 16:1-0 17:1-0 18:3-1 19:1-3 20:1-4 21:1-6 22:1-2 24:1-2 25:2-3
- Total margin (points – line): median -4.5, q25/q75 -12.0/+7.5; P(>+7) 0.29, P(<-7) 0.46
- **Walk-forward 47–73 in the training cut's direction (39.2%, n=125; raw O–U 65–55–5)** — cut chosen on seasons before N, printed on N; O/U after each year is the direction the training cut pointed. By year: 19:3-4O 20:10-17-3O 21:3-0U 22:8-8-1O 23:0-0U 24:39-23-1U 25:2-3U. OOS total margin median +1.5. Cuts picked: both teams went over last week, both off a 55+ point game, total ≥47 (2/7), outdoors, both teams went over last week, total 45–49 (1/7), line within 3 (1/7), Sunday late window, both teams went over last week, total ≥47 (1/7), line within 3, total 45–49 (1/7), outdoors (1/7).
- By total band: 45–49 6–11 (n=17); ≥50 6–11–1 (n=18)
