6. What does not apply

- 2+ time-zone trip: applies to ARI
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to NYG
- 2nd straight road game: applies to ARI
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: applies to ARI
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

7. Stack, without double-counting

Stack floor is $n \geq 20$ (tables use $n \geq 10$). Traits are added by largest parent-minus-child gap (the stack's pct against the pct of the games the trait removes), not by a fixed order. Read the hold-out first; the builder has no out-of-sample edge as a class (nine stacks picked at $\geq 60\%$ on 2015–20

went 81–15 then 40–39). Under each stack: hold-out, by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, the stack split by line bucket, a contrary cross (the team's own traits that run against it on the anchor, crossed into the stack), and a hold-out (traits chosen on 2015–20 only at a scaled floor of $n \geq 10$, printed on 2021–25).

- **NYG +2.5** — one population: Sunday early window home dog +1 to +3; off EPA ≤ -1 last; opponent off a cover. ATS 15–4–2 (78.9%, $n=21$). Not added (no gap with $n \geq 20$ left): equal rest, host of a 2+ zone visitor, host of a ≥ 1000 mi visitor, off a win, off a 1-score win, off a cover, off a win as favorite, off a home game....
- **Hold-out** (traits chosen on 2015–20 only at $n \geq 10$: Sunday early window home dog +1 to +3; off a win; outdoors): 2015–20 9–2 (81.8%, $n=11$) → 2021–25 4–12–3 (25.0%, $n=19$)
- By season: 15:2-0 16:1-1 17:2-1 18:1-0 21:1-0 22:0-1 23:5-0 24:2-0 25:1-1
- Cover margin: median +5.5, $q_{25}/q_{75} +0.0/+10.0$; $P(>+7)$ 0.38, $P(<-7)$ 0.10
- Parent minus child: without 'off EPA ≤ -1 last': 25–19–2 (56.8%, $n=46$), the games it removed: 10–15 (40.0%, $n=25$) | without 'opponent off a cover': 28–15–3 (65.1%, $n=46$), the games it removed: 13–11–1 (54.2%, $n=25$)
- Anchor alone 43–47–4 (47.8%, $n=94$); anchor minus stack 28–43–2 (39.4%, $n=73$)
- Stack by line bucket: +1 to +3 15–4–2 (78.9%, $n=21$)
- Contrary cross (team's own traits that run against it on this anchor, then crossed into the stack): TO ≤ 1 last: 20–28–1 (41.7%, $n=49$) → in stack 8–1–1 (88.9%, $n=10$) | opponent off a loss: 16–23–2 (41.0%, $n=41$) → in stack 1–0 (100.0%, $n=1$) | off a win as favorite: 5–8–1 (38.5%, $n=14$) → in stack 2–0 (100.0%, $n=2$) | 2nd straight home game: 10–14–1 (41.7%, $n=25$) → in stack 3–1–1 (75.0%, $n=5$)
- **ARI -2.5** — one population: Sunday early window road fav -1 to -3; allowed ≥ 30 last. ATS 14–5–1 (73.7%, $n=20$). Not added (no gap with $n \geq 20$ left): equal rest, trip ≥ 1000 mi, trip ≥ 2000 mi, 2+ time zones, west team east, early kick, off a loss, off a 1-score loss, off a cover....
- **Hold-out** (traits chosen on 2015–20 only at $n \geq 10$: Sunday early window road fav -1 to -3; opponent off a win; outdoors): 2015–20 2–9 (18.2%, $n=11$) → 2021–25 12–4–3 (75.0%, $n=19$)
- By season: 16:0-1 17:0-1 18:1-1 20:3-1 21:2-1 22:2-0 23:1-0 24:2-0 25:3-0
- Cover margin: median +3.0, $q_{25}/q_{75} -1.5/+6.1$; $P(>+7)$ 0.20, $P(<-7)$ 0.15
- Parent minus child: without 'allowed ≥ 30 last': 47–43–4 (52.2%, $n=94$), the games it removed: 33–38–3 (46.5%, $n=74$)
- Anchor alone 47–43–4 (52.2%, $n=94$); anchor minus stack 33–38–3 (46.5%, $n=74$)
- Stack by line bucket: -1 to -3 14–5–1 (73.7%, $n=20$)
- Contrary cross (team's own traits that run against it on this anchor, then crossed into the stack): off a cover: 19–25–2 (43.2%, $n=46$) → in stack 0–1 (0.0%, $n=1$) | 2nd straight road game: 13–18–2 (41.9%, $n=33$) → in stack 5–2–1 (71.4%, $n=8$) | off a road game: 13–18–2 (41.9%, $n=33$) → in stack 5–2–1 (71.4%, $n=8$) | 0 turnovers last: 9–13–1 (40.9%, $n=23$) → in stack 0–0 (—, $n=0$)
- **Total 44.5, tightest cut clearing $n = 20$** : line within 3, visitor crossing 2+ zones — O–U 52–40–1 (56.5%, $n=93$).
- By season (O–U): 15:3-2 16:7-4 17:9-0 18:4-1 19:6-2 20:2-3 21:5-4 22:3-7 23:4-7 24:2-6 25:7-4
- Total margin (points – line): median +1.5, $q_{25}/q_{75} -5.0/+7.0$; $P(>+7)$ 0.25, $P(<-7)$ 0.22
- **Hold-out** (cut chosen on 2015–20 only at $n \geq 10$: line within 3, visitor crossing 2+ zones): 2015–20 31–12–1 (72.1%, $n=44$) → 2021–25 21–28 (42.9%, $n=49$) — same cut as above
- By total band: ≤ 39 2–3 ($n=5$); 40–44 20–14 ($n=34$); 45–49 26–18 ($n=44$); ≥ 50 4–5–1 ($n=10$)
