6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to SF
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: no
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

7. Stack, without double-counting

Stack floor is $n \geq 20$ (tables use $n \geq 10$). Traits are added by largest parent-minus-child gap (the stack's pct against the pct of the games the trait removes), not by a fixed order. Read the hold-out first; the builder has no out-of-sample edge as a class (nine stacks picked at $\geq 60\%$ on 2015–20 went 81–15 then 40–39). Under each stack: hold-out, by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, the stack split by line bucket, a contrary cross (the team's own traits that run against it on the anchor, crossed into the stack), and a hold-out (traits chosen on 2015–20 only at a scaled floor of $n \geq 10$, printed on 2021–25).

- **SF -3.0** — one population: Sunday late window home fav -1 to -3; outdoors; next opponent is a favorite over them ($n_{\text{line}} > 0$). ATS 8–14 (36.4%, $n=22$). Not added (no gap with $n \geq 20$ left): equal rest, off a win, off a 1-score win, off an ATS miss, off a win as favorite, off a home game, 2nd straight home game, off a division game....
- **Hold-out** (traits chosen on 2015–20 only at $n \geq 10$: Sunday late window home fav -1 to -3; next opponent is a favorite over them ($n_{\text{line}} > 0$); opponent off a cover): 2015–20 3–8 (27.3%, $n=11$) → 2021–25 4–4 (50.0%, $n=8$)
- By season: 15:1-0 16:0-1 17:0-4 18:1-3 19:2-1 20:1-1 21:0-1 22:1-2 23:1-1 24:1-0
- Cover margin: median -3.8, q_{25}/q_{75} -10.6/+3.1; $P(>+7)$ 0.18, $P(<-7)$ 0.41
- Parent minus child: without 'outdoors': 14–16 (46.7%, $n=30$), the games it removed: 6–2 (75.0%, $n=8$) | without 'next opponent is a favorite over them ($n_{\text{line}} > 0$)': 10–22–2 (31.2%, $n=34$), the games it removed: 2–8–2 (20.0%, $n=12$)
- Anchor alone 18–28–2 (39.1%, $n=48$); anchor minus stack 10–14–2 (41.7%, $n=26$)
- Stack by line bucket: -1 to -3 8–14 (36.4%, $n=22$)
- Contrary cross (team's own traits that run against it on this anchor, then crossed into the stack): allowed ≥ 30 last: 3–12 (20.0%, $n=15$) → in stack 1–7 (12.5%, $n=8$) | equal rest: 8–19–1 (29.6%, $n=28$) → in stack 5–10 (33.3%, $n=15$) | allowed ≥ 27 last: 7–17–1 (29.2%, $n=25$) → in stack 4–10 (28.6%, $n=14$) | off an ATS miss: 7–16–2 (30.4%, $n=25$) → in stack 3–8 (27.3%, $n=11$)
- **DEN +3.0** — one population: Sunday late window road dog +1 to +3; TO ≤ 1 last; off a home game. ATS 18–6–1 (75.0%, $n=25$). Not added (no gap with $n \geq 20$ left): equal rest, trip 200–1000 mi, 1 time zone, off a win, off a 1-score win, off a cover, off a win as favorite, off a prime-time game....
- **Hold-out** (traits chosen on 2015–20 only at $n \geq 10$: Sunday late window road dog +1 to +3; TO ≤ 1 last; off a prime-time game): 2015–20 9–1 (90.0%, $n=10$) → 2021–25 2–2 (50.0%, $n=4$)
- By season: 16:1-0 17:2-0 18:3-1 19:3-1 20:1-0 21:1-1 22:3-1 23:1-1 24:1-1 25:2-0
- Cover margin: median +4.0, q_{25}/q_{75} +0.0/+12.5; $P(>+7)$ 0.40, $P(<-7)$ 0.16
- Parent minus child: without 'TO ≤ 1 last': 21–11–2 (65.6%, $n=34$), the games it removed: 3–5–1 (37.5%, $n=9$) | without 'off a home game': 24–11–1 (68.6%, $n=36$), the games it removed: 6–5 (54.5%, $n=11$)
- Anchor alone 28–18–2 (60.9%, $n=48$); anchor minus stack 10–12–1 (45.5%, $n=23$)
- Stack by line bucket: +1 to +3 18–6–1 (75.0%, $n=25$)
- Contrary cross (team's own traits that run against it on this anchor, then crossed into the stack): off yards ≤ 300 last: 4–10–1 (28.6%, $n=15$) → in stack 4–5–1 (44.4%, $n=10$) | 1 time zone: 5–8 (38.5%, $n=13$) → in stack 5–3 (62.5%, $n=8$)
- **Total 47.5, tightest cut clearing $n = 20$:** both teams went over last week, both off a 55+ point game, total ≥ 47 — O–U 12–22–1 (35.3%, $n=35$).
- By season (O–U): 15:0-1 16:1-0 17:1-0 18:3-1 19:1-3 20:1-4 21:1-6 22:1-2 24:1-2 25:2-3
- Total margin (points – line): median -4.5, q_{25}/q_{75} -12.0/+7.5; $P(>+7)$ 0.29, $P(<-7)$ 0.46
- **Hold-out** (cut chosen on 2015–20 only at $n \geq 10$: Sunday late window, both teams went over last week, total ≥ 47): 2015–20 5–10–1 (33.3%, $n=16$) → 2021–25 6–6 (50.0%, $n=12$)
- By total band: 45–49 6–11 ($n=17$); ≥ 50 6–11–1 ($n=18$)
