## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: applies to JAX
- 2nd straight home game: no
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored  $\leq 10$  last: no
- short week: no
- trip  $\geq 1000$  mi: no
- TO  $\geq 3$  last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ). Traits are added by largest parent-minus-child gap (the stack's pct against the pct of the games the trait removes), not by a fixed order. Read the hold-out first; the builder has no out-of-sample edge as a class (nine stacks picked at  $\geq 60\%$  on 2015–20 went 81–15 then 40–39). Under each stack: hold-out, by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, the stack split by line bucket, a contrary cross (the team's own traits that run against it on the anchor, crossed into the stack), and a hold-out (traits chosen on 2015–20 only at a scaled floor of  $n \geq 10$ , printed on 2021–25).

- **CIN -2.5** — one population: Sunday early window home fav -1 to -3; allowed  $\geq 30$  last; off a road game. ATS 6–15–1 (28.6%,  $n=22$ ). Not added (no gap with  $n \geq 20$  left): equal rest, off a loss, off a 1-score loss, off an ATS miss, off a loss as favorite, off a division game, scored 27–33 last, allowed  $\geq 27$  last....
- **Hold-out** (traits chosen on 2015–20 only at  $n \geq 10$ : Sunday early window home fav -1 to -3; off a loss, opponent off a win): 2015–20 2–8 (20.0%,  $n=10$ ) → 2021–25 6–4–1 (60.0%,  $n=11$ )
- By season: 15:0-2 16:1-0 17:0-1 18:2-1 19:1-2 20:0-3 21:0-3 22:0-1 23:0-2 24:0-0 25:2-0
- Cover margin: median -5.5,  $q_{25}/q_{75}$  -10.6/+1.5;  $P(>+7)$  0.14,  $P(<-7)$  0.45
- Parent minus child: without 'allowed  $\geq 30$  last': 30–39–5 (43.5%,  $n=74$ ), the games it removed: 24–24–4 (50.0%,  $n=52$ ) | without 'off a road game': 7–19–1 (26.9%,  $n=27$ ), the games it removed: 1–4 (20.0%,  $n=5$ )
- Anchor alone 44–57–6 (43.6%,  $n=107$ ); anchor minus stack 38–42–5 (47.5%,  $n=85$ )
- Stack by line bucket: -1 to -3 6–15–1 (28.6%,  $n=22$ )
- Contrary cross (team's own traits that run against it on this anchor, then crossed into the stack): off a 1-score loss: 7–18–1 (28.0%,  $n=26$ ) → in stack 1–8 (11.1%,  $n=9$ ) | equal rest: 20–36–3 (35.7%,  $n=59$ ) → in stack 2–11–1 (15.4%,  $n=14$ ) | lost last despite off EPA  $\geq +1$ : 3–11 (21.4%,  $n=14$ ) → in stack 1–6 (14.3%,  $n=7$ ) | off a loss: 17–31–2 (35.4%,  $n=50$ ) → in stack 5–14–1 (26.3%,  $n=20$ )
- **JAX +2.5** — one population: Sunday early window road dog +1 to +3; trip 200–1000 mi; opponent off an ATS miss; off a home game. ATS 17–5–2 (77.3%,  $n=24$ ). Not added (no gap with  $n \geq 20$  left): equal rest, 0 time zones, off a win, off a win by 14+, off a win by 20+, off a cover, off a win as favorite, scored  $\geq 30$  last....
- **Hold-out** (traits chosen on 2015–20 only at  $n \geq 10$ : Sunday early window road dog +1 to +3; off EPA  $\geq +8$  last; off a win as favorite): 2015–20 10–0 (100.0%,  $n=10$ ) → 2021–25 4–5 (44.4%,  $n=9$ )
- By season: 15:3-0 17:0-0 18:2-0 19:1-1 20:1-0 21:2-1 22:3-1 23:4-0 24:1-0 25:0-2
- Cover margin: median +5.5,  $q_{25}/q_{75}$  +0.0/+9.5;  $P(>+7)$  0.38,  $P(<-7)$  0.04
