6. What does not apply

- 2+ time-zone trip: applies to LA
- double-digit dog: no
- off a 10-point loss: applies to PHI
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to LA
- bye next week: no
- off a bye: no
- scored ≤10 last: applies to PHI
- short week: no
- trip ≥1000 mi: applies to LA
- TO ≥3 last: applies to PHI
- undefeated entering: no
- winless entering: no

7. Stack, without double-counting

Stack floor is $n \geq 20$ (tables use $n \geq 10$). Traits are added by largest parent-minus-child gap (the stack's pct against the pct of the games the trait removes), not by a fixed order. Read the hold-out first; the builder has no out-of-sample edge as a class (nine stacks picked at ≥60% on 2015–20 went 81–15 then 40–39). Under each stack: hold-out, by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without

each trait, and the games that trait removed), the anchor's complement, the stack split by line bucket, a contrary cross (the team's own traits that run against it on the anchor, crossed into the stack), and a hold-out (traits chosen on 2015–20 only at a scaled floor of $n \geq 10$, printed on 2021–25).

- **PHI +3.5** — one population: Sunday early window home dog +3.5 to +6.5; outdoors; allowed ≥ 27 last. ATS 14–7 (66.7%, $n=21$). Not added (no gap with $n \geq 20$ left): host of a 2+ zone visitor, host of a ≥ 1000 mi visitor, off a loss, off a loss by 10+, off a loss by 20+, off an ATS miss, off a loss as favorite, off a prime-time game...
- **Hold-out** (traits chosen on 2015–20 only at $n \geq 10$: Sunday early window home dog +3.5 to +6.5; next game is road; off EPA ≤ -1 last): 2015–20 6–5 (54.5%, $n=11$) → 2021–25 5–6 (45.5%, $n=11$)
- By season: 15:2-0 16:0-1 17:2-1 18:0-1 19:3-0 20:1-0 21:1-2 22:1-0 23:2-1 25:2-1
- Cover margin: median +1.5, q_{25}/q_{75} -3.5/+5.0; $P(>+7)$ 0.24, $P(<-7)$ 0.19
- Parent minus child: without 'outdoors': 15–7 (68.2%, $n=22$), the games it removed: 1–0 (100.0%, $n=1$) | without 'allowed ≥ 27 last': 26–20 (56.5%, $n=46$), the games it removed: 12–13 (48.0%, $n=25$)
- Anchor alone 28–26 (51.9%, $n=54$); anchor minus stack 14–19 (42.4%, $n=33$)
- Stack by line bucket: +3.5 to +6.5 14–7 (66.7%, $n=21$)
- Contrary cross (team's own traits that run against it on this anchor, then crossed into the stack): scored ≤ 21 last: 14–16 (46.7%, $n=30$) → in stack 6–2 (75.0%, $n=8$) | off a road game: 16–18 (47.1%, $n=34$) → in stack 9–3 (75.0%, $n=12$) | scored ≤ 10 last: 6–7 (46.2%, $n=13$) → in stack 3–2 (60.0%, $n=5$) | both off a loss: 8–9 (47.1%, $n=17$) → in stack 6–4 (60.0%, $n=10$)
- **LA -3.5** — one population: Sunday early window road fav -3.5 to -6.5; outdoors; next game is home non-division; opponent off a loss. ATS 10–11 (47.6%, $n=21$). Not added (no gap with $n \geq 20$ left): trip ≥ 1000 mi, trip ≥ 2000 mi, 2+ time zones, west team east, early kick, off a loss, off a 1-score loss, off an ATS miss, off a loss as dog...
- **Hold-out** (traits chosen on 2015–20 only at $n \geq 10$: Sunday early window road fav -3.5 to -6.5; next game is home non-division; opponent off a loss): 2015–20 5–6 (45.5%, $n=11$) → 2021–25 6–6 (50.0%, $n=12$)
- By season: 16:1-1 17:3-1 18:0-1 19:1-2 20:0-1 21:1-0 22:0-2 23:1-0 24:2-0 25:1-3
- Cover margin: median -1.0, q_{25}/q_{75} -7.0/+6.0; $P(>+7)$ 0.24, $P(<-7)$ 0.24
- Parent minus child: without 'outdoors': 11–12 (47.8%, $n=23$), the games it removed: 1–1 (50.0%, $n=2$) | without 'next game is home non-division': 13–17 (43.3%, $n=30$), the games it removed: 3–6 (33.3%, $n=9$) | without 'opponent off a loss': 16–14 (53.3%, $n=30$), the games it removed: 6–3 (66.7%, $n=9$)
- Anchor alone 26–28 (48.1%, $n=54$); anchor minus stack 16–17 (48.5%, $n=33$)
- Stack by line bucket: -3.5 to -6.5 10–11 (47.6%, $n=21$)
- Contrary cross (team's own traits that run against it on this anchor, then crossed into the stack): 2+ time zones: 4–6 (40.0%, $n=10$) → in stack 1–3 (25.0%, $n=4$) | west team east, early kick: 4–6 (40.0%, $n=10$) → in stack 1–3 (25.0%, $n=4$) | off yards ≥ 400 last: 10–13 (43.5%, $n=23$) → in stack 4–6 (40.0%, $n=10$) | road team from dome, outdoors: 5–7 (41.7%, $n=12$) → in stack 2–3 (40.0%, $n=5$)
- **Total 42.5, tightest cut clearing $n = 20$** : outdoors, visitor crossing 2+ zones — O–U 91–77–2 (54.2%, $n=170$).
- By season (O–U): 15:11-10 16:13-5 17:13-6 18:6-1 19:10-11 20:6-10 21:5-8 22:4-8 23:6-7 24:8-4 25:9-7
- Total margin (points – line): median +1.5, q_{25}/q_{75} -6.4/+8.0; $P(>+7)$ 0.28, $P(<-7)$ 0.24
- **Hold-out** (cut chosen on 2015–20 only at $n \geq 10$: visitor crossing 2+ zones): 2015–20 73–52–1 (58.4%, $n=126$) → 2021–25 53–61–2 (46.5%, $n=116$)
- By total band: ≤ 39 3–6–1 ($n=10$); 40–44 37–31–1 ($n=69$); 45–49 39–31 ($n=70$); ≥ 50 10–8 ($n=18$)
