6. What does not apply

- 2+ time-zone trip: applies to ARI
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to NYG
- 2nd straight road game: applies to ARI
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: applies to ARI
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

7. Stack, without double-counting

- **NYG +2.5** — one population: home dog +1 to +3; off a win; off a 1-score win; off a cover; off a home game; next game is road. ATS 4–5–1 (44.4%, n=10). Not added (n would fall under 10, or the trait does not narrow the population): off a win as favorite, 2nd straight home game, host of a 2+ zone visitor, host of a ≥ 1000 mi visitor, next game is division, next opponent is a favorite over them (n_line>0), equal rest, opponent off a loss....

- **ARI -2.5** — one population: road fav -1 to -3; off a loss; off a 1-score loss; off a loss as dog; off a division game. ATS 4-6 (40.0%, n=10).
Not added (n would fall under 10, or the trait does not narrow the population): off a cover, off a road game, 2nd straight road game, trip ≥ 1000 mi, trip ≥ 2000 mi, 2+ time zones, west team east, early kick, next game is home....
