outdoors, total ≤ 40	38–35–1	52.1%	74

6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: applies to GB
- off a 20-point win: no
- 2nd straight home game: applies to TB
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: applies to GB
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

7. Stack, without double-counting

- **TB +3.5** — one population: home dog $+3.5$ to $+6.5$; off a loss; off a 1-score loss; off an ATS miss; next game is road. ATS 4–6 (40.0%, $n=10$). Not added (n would fall under 10, or the trait does not narrow the population): off a loss as dog, off a home game, 2nd straight home game, host of a ≥ 1000 mi visitor, next game is road non-division, next game is prime time, next game is Thursday (short week ahead), next opponent is a favorite over them ($n_{line}>0$)....

- **GB -3.5** — one population: road fav -3.5 to -6.5; off a loss; off a loss by 10+; off an ATS miss; off a loss as favorite. ATS 4-6 (40.0%, n=10). Not added (n would fall under 10, or the trait does not narrow the population): off a loss by 20+, off a prime-time game, off a home game, trip ≥ 1000 mi, 1 time zone, next game is home, next game is division, long rest (≥ 10 days)....
