6. What does not apply

- 2+ time-zone trip: applies to LA
- double-digit dog: no
- off a 10-point loss: applies to PHI
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to LA
- bye next week: no
- off a bye: no
- scored ≤ 10 last: applies to PHI
- short week: no
- trip ≥ 1000 mi: applies to LA
- TO ≥ 3 last: applies to PHI
- undefeated entering: no
- winless entering: no

7. Stack, without double-counting

- **PHI +3.5** — one population: home dog +3.5 to +6.5; off a loss; off a loss by 10+; off a loss by 20+; off a road game. ATS 5–5 (50.0%, n=10). Not added (n would fall under 10, or the trait does not narrow the population): off an ATS miss, off a loss as favorite, off a prime-time game, host of a 2+ zone visitor, host of a ≥ 1000 mi visitor, next game is road, next game is road non-division, next opponent is a favorite over them (n_line>0)....

- **LA -3.5** — one population: road fav -3.5 to -6.5; off a loss; off a 1-score loss; next game is home; next game is home non-division. ATS 11-0 (100.0%, n=11). Not added (n would fall under 10, or the trait does not narrow the population): off an ATS miss, off a loss as dog, off a prime-time game, off a road game, 2nd straight road game, trip ≥ 1000 mi, trip ≥ 2000 mi, 2+ time zones....
