Last game EPA (PBP): ATL off +22.9, def allowed +1.8, net +21.0, SR 0.64. NO off -5.3, def allowed +9.9, net -15.2, SR 0.54. Records: ATL 1–2, NO 1–2. ATS: ATL 1–2, NO 2–1.

2. Lookahead and rest

- ATL: last played week 3 (Thursday night, road, won by 21). 11 days rest. Week 5: home vs BAL, non-division, Sunday night.
- NO: last played week 3 (Sunday late window, home, lost by 8). 8 days rest. Week 5: home vs MIN, non-division, Sunday early window.

3. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: applies to ATL
- 2nd straight home game: applies to NO
- 2nd straight road game: applies to ATL
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: no
- TO ≥ 3 last: applies to NO
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Chairs are built on different conditioning sets — read the second as a cross-check on the first, not a second sample.

- NO -2.5** — one population: Monday night home favorite; next game is home. Not added (no gap with $n \geq 20$ left): rest deficit ≥ 3 days, off a loss, off a 1-score loss, off an ATS miss, off a loss as favorite, off a home game, 2nd straight home game, scored 27–33 last....
- Walk-forward 6–5 (54.5%, n=11)** — picked on seasons before N, printed on N, 2019–25. By year: 19:2-0 20:0-0 21:1-2 22:1-1 23:0-0 24:1-2 25:1-0. OOS cover margin median +2.0, $P(>+7)$ 0.36, $P(<-7)$ 0.18. Traits picked in ≥ 4 of 7 folds: Monday night home favorite (4/7).
- Full-window stack (picked on all seasons): Monday night home favorite; next game is home. ATS 9–11 (45.0%, n=20).
- By season: 15:0-2 16:3-0 17:1-0 19:1-2 20:1-1 21:1-3 22:0-2 23:1-0 24:0-1 25:1-0
- Cover margin: median -0.8, q25/q75 -3.2/+9.1; $P(>+7)$ 0.35, $P(<-7)$ 0.05
- Parent minus child: without 'next game is home': 27–23 (54.0%, n=50), the games it removed: 18–12 (60.0%, n=30)
- Anchor alone 27–23 (54.0%, n=50); anchor minus stack 18–12 (60.0%, n=30)
- Stack by line bucket: -1 to -3 2–0 (100.0%, n=2); -3.5 to -6.5 4–4 (50.0%, n=8); -7 to -9.5 3–5 (37.5%, n=8); -10 or more 0–2 (0.0%, n=2)

- Contrary cross: allowed ≥ 27 last: 5–11 (31.2%, n=16) → in stack 1–5 (16.7%, n=6) | rest deficit ≥ 3 days: 3–7 (30.0%, n=10) → in stack 1–2 (33.3%, n=3) | next game is home non-division: 4–8 (33.3%, n=12) → in stack 4–8 (33.3%, n=12) | off yards ≥ 400 last: 6–10 (37.5%, n=16) → in stack 1–5 (16.7%, n=6)
- ATL +2.5** — one population: Monday night road dog; next opponent is a favorite over them ($n_{line} > 0$); next game is home. Not added (no gap with $n \geq 20$ left): long rest (≥ 10 days), rest edge ≥ 3 days, trip 200–1000 mi, 1 time zone, off a win, off a win by 14+, off a win by 20+, off a cover....
- Walk-forward 8–5 (61.5%, n=13)** — picked on seasons before N, printed on N, 2019–25. By year: 19:2-0 20:1-1 21:2-1 22:1-1 23:0-0 24:2-1 25:0-1. OOS cover margin median +1.5, $P(>+7)$ 0.23, $P(<-7)$ 0.23. Traits picked in ≥ 4 of 7 folds: Monday night road dog (4/7).
- Full-window stack (picked on all seasons): Monday night road dog; next opponent is a favorite over them ($n_{line} > 0$); next game is home. ATS 13–8 (61.9%, n=21).
- By season: 15:3-0 17:0-2 18:3-1 19:2-0 20:1-1 21:2-0 22:1-0 24:1-2 25:0-2
- Cover margin: median +1.5, q25/q75 -7.0/+6.0; $P(>+7)$ 0.19, $P(<-7)$ 0.24
- Parent minus child: without 'next opponent is a favorite over them ($n_{line} > 0$)': 19–22 (46.3%, n=41), the games it removed: 6–14 (30.0%, n=20) | without 'next game is home': 17–12 (58.6%, n=29), the games it removed: 4–4 (50.0%, n=8)
- Anchor alone 23–27 (46.0%, n=50); anchor minus stack 10–19 (34.5%, n=29)
- Stack by line bucket: +1 to +3 1–0 (100.0%, n=1); +3.5 to +6.5 6–5 (54.5%, n=11); +7 to +9.5 3–2 (60.0%, n=5); +10 or more 3–1 (75.0%, n=4)
- Contrary cross: off a win: 5–14 (26.3%, n=19) → in stack 2–4 (33.3%, n=6) | 2nd straight road game: 6–12 (33.3%, n=18) → in stack 2–4 (33.3%, n=6) | off a road game: 6–12 (33.3%, n=18) → in stack 2–4 (33.3%, n=6) | net EPA $\geq +10$ last: 4–9 (30.8%, n=13) → in stack 2–2 (50.0%, n=4)
- Total 47.5** — tightest full-window cut clearing $n = 20$: Monday night, dome — O–U 4–16 (20.0%, n=20).
- By season (O–U): 15:0-1 16:0-2 18:2-0 20:1-2 21:0-1 22:0-2 23:0-4 24:1-1 25:0-3
- Total margin (points – line): median -9.0, q25/q75 -11.6/-5.5; $P(>+7)$ 0.15, $P(<-7)$ 0.60
- Walk-forward 31–31 in the training cut's direction (50.0%, n=66; raw O–U 23–39–4)** — cut chosen on seasons before N, printed on N; O/U after each year is the direction the training cut pointed. By year: 19:0-10 20:10-17-30 21:3-3U 22:8-8-10 23:0-6U 24:2-1U 25:0-3U. OOS total margin median -4.2. Cuts picked: Monday night (2/7), both teams went over last week, both scored 27+ last week, total 45–49 (1/7), line within 3 (1/7), line within 3, total 45–49 (1/7), Monday night, line within 3 (1/7), Monday night, dome (1/7).
- By total band: 40–44 1–4 (n=5); 45–49 2–8 (n=10); ≥ 50 1–4 (n=5)
