Last game EPA (PBP): JAX off +11.8, def allowed -15.9, net +27.8, SR 0.49. CIN off +14.8, def allowed +11.3, net +3.6, SR 0.54. Records: JAX 2–1, CIN 2–1. ATS: JAX 2–1, CIN 2–1.

2. Lookahead and rest

- JAX: last played week 3 (Sunday early window, home, won by 29). 7 days rest. Week 5: home vs PHI, non-division, Sunday early window.
- CIN: last played week 3 (Sunday early window, road, lost by 3). 7 days rest. Week 5: road vs MIA, non-division, Sunday early window.

3. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: applies to JAX
- 2nd straight home game: no
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: no
- TO ≥ 3 last: no
- undefeated entering: no
- winless entering: no

4. Stack, without double-counting

Header per chair is the walk-forward record: traits picked by max parent-minus-child gap on seasons before N at $n \geq 10$, printed on season N, N = 2019–2025, pooled. Every printed game is out of sample. The full-window stack (picked on all seasons at $n \geq 20$) and its diagnostics sit in the block below it. Same gate on every slot.

Chairs are built on different conditioning sets — read the second as a cross-check on the first, not a second sample.

- CIN -2.5 — one population: Sunday early window home fav -1 to -3; allowed ≥ 30 last; off a road game. Not added (no gap with $n \geq 20$ left): equal rest, off a loss, off a 1-score loss, off an ATS miss, off a loss as favorite, off a division game, scored 27–33 last, allowed ≥ 27 last....
- Walk-forward 4–7–1 (36.4%, n=12) — picked on seasons before N, printed on N, 2019–25. By year: 19:2-1 20:1-1 21:0-0 22:1-3 23:0-2 24:0-0-1 25:0-0. OOS cover margin median -3.2, $P(>+7)$ 0.08, $P(<-7)$ 0.33. Traits picked in ≥ 4 of 7 folds: Sunday early window home fav -1 to -3 (7/7), equal rest (4/7).
- Full-window stack (picked on all seasons): Sunday early window home fav -1 to -3; allowed ≥ 30 last; off a road game. ATS 6–15–1 (28.6%, n=22).
- By season: 15:0-2 16:1-0 17:0-1 18:2-1 19:1-2 20:0-3 21:0-3 22:0-1 23:0-2 24:0-0 25:2-0
- Cover margin: median -5.5, q25/q75 -10.6/+1.5; $P(>+7)$ 0.14, $P(<-7)$ 0.45

- Parent minus child: without 'allowed ≥ 30 last': 30–39–5 (43.5%, n=74), the games it removed: 24–24–4 (50.0%, n=52) | without 'off a road game': 7–19–1 (26.9%, n=27), the games it removed: 1–4 (20.0%, n=5)
- Anchor alone 44–57–6 (43.6%, n=107); anchor minus stack 38–42–5 (47.5%, n=85)
- Stack by line bucket: -1 to -3 6–15–1 (28.6%, n=22)
- Contrary cross: off a 1-score loss: 7–18–1 (28.0%, n=26) → in stack 1–8 (11.1%, n=9) | equal rest: 20–36–3 (35.7%, n=59) → in stack 2–11–1 (15.4%, n=14) | lost last despite off EPA $\geq +1$: 3–11 (21.4%, n=14) → in stack 1–6 (14.3%, n=7) | off a loss: 17–31–2 (35.4%, n=50) → in stack 5–14–1 (26.3%, n=20)
- **JAX +2.5** — one population: Sunday early window road dog +1 to +3; trip 200–1000 mi; opponent off an ATS miss; off a home game. Not added (no gap with n ≥ 20 left): equal rest, 0 time zones, off a win, off a win by 14+, off a win by 20+, off a cover, off a win as favorite, scored ≥ 30 last....
- **Walk-forward 7–6 (53.8%, n=13)** — picked on seasons before N, printed on N, 2019–25. By year: 19:2-1 20:2-0 21:0-1 22:0-1 23:1-1 24:0-1 25:2-1. OOS cover margin median +0.5, P(>+7) 0.38, P(<-7) 0.15. Traits picked in ≥ 4 of 7 folds: Sunday early window road dog +1 to +3 (7/7), off EPA $\geq +8$ last (4/7).
- Full-window stack (picked on all seasons): Sunday early window road dog +1 to +3; trip 200–1000 mi; opponent off an ATS miss; off a home game. ATS 17–5–2 (77.3%, n=24).
- By season: 15:3-0 17:0-0 18:2-0 19:1-1 20:1-0 21:2-1 22:3-1 23:4-0 24:1-0 25:0-2
- Cover margin: median +5.5, q25/q75 +0.0/+9.5; P(>+7) 0.38, P(<-7) 0.04
- Parent minus child: without 'trip 200–1000 mi': 22–12–2 (64.7%, n=36), the games it removed: 5–7 (41.7%, n=12) | without 'opponent off an ATS miss': 28–12–2 (70.0%, n=42), the games it removed: 11–7 (61.1%, n=18) | without 'off a home game': 23–6–2 (79.3%, n=31), the games it removed: 6–1 (85.7%, n=7)
- Anchor alone 57–44–6 (56.4%, n=107); anchor minus stack 40–39–4 (50.6%, n=83)
- Stack by line bucket: +1 to +3 17–5–2 (77.3%, n=24)
- Contrary cross: no trait the team carries runs under 50% on this anchor at n ≥ 10 .
- **Total 51.5** — tightest full-window cut clearing n = 20: line within 3, both off +8 off EPA — O–U 11–26 (29.7%, n=37).
- By season (O–U): 16:1-4 17:2-1 18:2-3 19:0-2 20:1-1 21:1-1 22:0-5 23:1-1 24:2-5 25:1-3
- Total margin (points – line): median -4.5, q25/q75 -7.5/+6.5; P(>+7) 0.22, P(<-7) 0.30
- **Walk-forward 14–13 in the training cut's direction (51.9%, n=27; raw O–U 13–14)** — cut chosen on seasons before N, printed on N; O/U after each year is the direction the training cut pointed. By year: 19:0-0U 20:5-5U 21:2-2U 22:0-2U 23:1-0U 24:4-2U 25:1-3U. OOS total margin median -1.0. Cuts picked: outdoors, both off +8 off EPA, total ≥ 47 (2/7), both off +8 off EPA, total ≥ 50 (1/7), both off +8 off EPA, total ≥ 47 (1/7), outdoors, both off +8 off EPA, total ≥ 50 (1/7), Sunday early window, both off +8 off EPA, total ≥ 50 (1/7), line within 3, both off +8 off EPA (1/7).
- By total band: 40–44 2–5 (n=7); 45–49 5–13 (n=18); ≥ 50 4–8 (n=12)

Appendix A. Sides — CIN -2.5

CIN (home favorite)

Spot anchors (nested — the same games appear in more than one row; identical populations are collapsed below):

Cut	ATS	Pct	n
home favorite	265–294–16	47.4%	575
Sunday early window home favorite	145–150–10	49.2%	305
home fav -1 to -3	85–100–9	45.9%	194
Sunday early window fav -1 to -3	102–106–10	49.0%	218
Sunday early window home fav -1 to -3	44–57–6	43.6%	107

Conditionals on those anchors, ranked by distance from 50% scaled by n:

Cut	ATS	Pct	n
allowed ≥ 27 last, home favorite	84–123–6	40.6%	213
allowed ≥ 30 last, home fav -1 to -3	17–34–2	33.3%	53
