## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to SF
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored  $\leq 10$  last: no
- short week: no
- trip  $\geq 1000$  mi: no
- TO  $\geq 3$  last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ). Traits are added by largest parent-minus-child gap (the stack's pct against the pct of the games the trait removes), not by a fixed order. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without

each trait, and the games that trait removed), the anchor's complement, the stack split by line bucket, a contrary cross (the team's own traits that run against it on the anchor, crossed into the stack), and a hold-out (traits chosen on 2015–20 only at a scaled floor of  $n \geq 10$ , printed on 2021–25).

- **SF -3.0** — one population: Sunday late window fav -1 to -3; net EPA  $\geq +10$  last. ATS 16–10 (61.5%,  $n=26$ ). Not added (no gap with  $n \geq 20$  left): equal rest, off a win, off a 1-score win, off an ATS miss, off a win as favorite, off a home game, 2nd straight home game, off a division game....
- By season: 16:2-1 17:1-1 18:0-2 19:1-2 20:2-1 21:2-1 22:3-0 23:1-0 24:4-1 25:0-1
- Cover margin: median +3.2, q25/q75 -8.2/+8.4;  $P(>+7)$  0.35,  $P(<-7)$  0.27
- Parent minus child: without 'net EPA  $\geq +10$  last': 41–46–3 (47.1%,  $n=90$ ), the games it removed: 25–36–3 (41.0%,  $n=64$ )
- Anchor alone 41–46–3 (47.1%,  $n=90$ ); anchor minus stack 25–36–3 (41.0%,  $n=64$ )
- Stack by line bucket: -1 to -3 16–10 (61.5%,  $n=26$ )
- Contrary cross (team's own traits that run against it on this anchor, then crossed into the stack): allowed  $\geq 30$  last: 10–19 (34.5%,  $n=29$ ) → in stack 1–0 (100.0%,  $n=1$ ) | next game is road: 18–29 (38.3%,  $n=47$ ) → in stack 7–7 (50.0%,  $n=14$ ) | allowed  $\geq 27$  last: 16–26–1 (38.1%,  $n=43$ ) → in stack 1–2 (33.3%,  $n=3$ ) | off an ATS miss: 16–26–2 (38.1%,  $n=44$ ) → in stack 0–0 (—,  $n=0$ )
- Hold-out (traits chosen on 2015–20 only at  $n \geq 10$ : Sunday late window fav -1 to -3; off a home game; off an ATS miss): 2015–20 0–10 (0.0%,  $n=10$ ) → 2021–25 5–3–1 (62.5%,  $n=9$ )
- **DEN +3.0** — one population: Sunday late window dog +1 to +3; off yards  $\leq 300$  last. ATS 8–17–1 (32.0%,  $n=26$ ). Not added (no gap with  $n \geq 20$  left): equal rest, trip 200–1000 mi, 1 time zone, off a win, off a 1-score win, off a cover, off a win as favorite, off a prime-time game....
