6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: applies to ATL
- 2nd straight home game: applies to NO
- 2nd straight road game: applies to ATL
- bye next week: no
- off a bye: no
- scored $\leq$ 10 last: no
- short week: no
- trip $\geq$ 1000 mi: no
- TO $\geq$ 3 last: applies to NO

- undefeated entering: no
- winless entering: no

7. Stack, without double-counting

Stack floor is $n \geq 20$ (tables use $n \geq 10$) so the conjunction cannot bottom out on the cutoff.

- **NO -2.5** — one population: Monday night home favorite; off a loss. ATS 12–8 (60.0%, $n=20$). Not added (n would fall under 20, or the trait does not narrow the population): off a 1-score loss, off an ATS miss, off a loss as favorite, off a home game, 2nd straight home game, next game is home, next game is home non-division, next opponent is a favorite over them ($n_line>0$)....
- **ATL +2.5** — one population: Monday night road dog; off a cover; next game is home. ATS 9–12 (42.9%, $n=21$). Not added (n would fall under 20, or the trait does not narrow the population): off a win, off a win by 14+, off a win by 20+, off an upset win as dog, off a prime-time game, off a road game, 2nd straight road game, trip 200–1000 mi....
