6. What does not apply

- 2+ time-zone trip: applies to LA
- double-digit dog: no
- off a 10-point loss: applies to PHI
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to LA
- bye next week: no
- off a bye: no
- scored ≤10 last: applies to PHI
- short week: no
- trip ≥1000 mi: applies to LA
- TO ≥3 last: applies to PHI
- undefeated entering: no
- winless entering: no

7. Stack, without double-counting

Stack floor is $n \geq 20$ (tables use $n \geq 10$) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **PHI +3.5** — one population: home dog +3.5 to +6.5; off a loss; off a loss by 10+; off an ATS miss; off a road game. ATS 9–12 (42.9%, $n=21$). Not added (n would fall under 20, or the trait does not narrow the population): off a loss by 20+, off a loss as favorite, off a prime-

time game, host of a 2+ zone visitor, host of a ≥ 1000 mi visitor, next game is road, next game is road non-division, next opponent is a favorite over them ($n_line > 0$)....

- By season: 16:1-0 17:2-1 18:1-1 20:1-2 21:1-1 22:1-1 23:2-1 24:0-3 25:0-2
- Cover margin: median -0.5, q25/q75 -11.0/+2.5; $P(>+7)$ 0.14, $P(<-7)$ 0.29
- Parent minus child: without 'off a loss': 9-12 (42.9%, n=21), the games it removed: 0-0 (—, n=0) | without 'off a loss by 10+': 13-15 (46.4%, n=28), the games it removed: 4-3 (57.1%, n=7) | without 'off an ATS miss': 10-12 (45.5%, n=22), the games it removed: 1-0 (100.0%, n=1) | without 'off a road game': 14-19 (42.4%, n=33), the games it removed: 5-7 (41.7%, n=12)
- Anchor alone 48-57 (45.7%, n=105); anchor minus stack 39-45 (46.4%, n=84)
- Stack by line bucket: +3.5 to +6.5 9-12 (42.9%, n=21)
- **LA -3.5** — one population: road fav -3.5 to -6.5; off a loss; off a 1-score loss. ATS 18-3 (85.7%, n=21). Not added (n would fall under 20, or the trait does not narrow the population): off an ATS miss, off a loss as dog, off a prime-time game, off a road game, 2nd straight road game, trip ≥ 1000 mi, trip ≥ 2000 mi, 2+ time zones....
- By season: 15:2-0 16:1-0 17:3-1 19:2-0 20:2-0 21:2-0 23:1-0 24:5-1 25:0-1
- Cover margin: median +8.5, q25/q75 +3.5/+14.0; $P(>+7)$ 0.57, $P(<-7)$ 0.05
- Parent minus child: without 'off a loss': 18-3 (85.7%, n=21), the games it removed: 0-0 (—, n=0) | without 'off a 1-score loss': 23-16 (59.0%, n=39), the games it removed: 5-13 (27.8%, n=18)
- Anchor alone 57-48 (54.3%, n=105); anchor minus stack 39-45 (46.4%, n=84)
- Stack by line bucket: -3.5 to -6.5 18-3 (85.7%, n=21)
