## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: applies to CHI
- 2nd straight home game: applies to CHI
- 2nd straight road game: applies to NYJ
- bye next week: no
- off a bye: no
- scored  $\leq 10$  last: no
- short week: no
- trip  $\geq 1000$  mi: no
- TO  $\geq 3$  last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **CHI -3.5** — one population: Sunday early window fav -3.5 to -6.5; off a win; off a win by 14+; allowed  $\leq 17$  last; TO  $\leq 1$  last. ATS 8–12–1 (40.0%,  $n=21$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a win by 20+, off a cover, off an upset win as dog, off a prime-time game, off a home game, 2nd straight home game, next game is road, next game is division....
- By season: 15:0-2 16:1-2 17:3-1 18:0-1 19:2-1 20:1-1 22:1-1 23:0-1 24:0-1 25:0-1
- Cover margin: median -4.5, q25/q75 -11.5/+2.0;  $P(>+7)$  0.19,  $P(<-7)$  0.43
- Parent minus child: without 'off a win': 8–12–1 (40.0%,  $n=21$ ), the games it removed: 0–0 (—,  $n=0$ ) | without 'off a win by 14+': 15–20–1 (42.9%,  $n=36$ ), the games it removed: 7–8 (46.7%,  $n=15$ ) | without 'allowed  $\leq 17$  last': 10–15–1 (40.0%,  $n=26$ ), the games it removed: 2–3 (40.0%,  $n=5$ ) | without 'TO  $\leq 1$  last': 10–15–1 (40.0%,  $n=26$ ), the games it removed: 2–3 (40.0%,  $n=5$ )
- Anchor alone 80–82–1 (49.4%,  $n=163$ ); anchor minus stack 72–70 (50.7%,  $n=142$ )
- Stack by line bucket: -3.5 to -6.5 8–12–1 (40.0%,  $n=21$ )
- **NYJ +3.5** — one population: Sunday early window dog +3.5 to +6.5; off a loss; off a 1-score loss; off a loss as dog. ATS 14–15 (48.3%,  $n=29$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a road game, 2nd straight road game, trip 200–1000 mi, 1 time zone, next game is home, next game is home non-division, opponent off a win, opponent off a win by 20+....
- By season: 15:1-2 16:3-1 17:3-0 18:0-1 19:3-1 20:2-2 21:0-2 22:2-1 24:0-3 25:0-2

- Cover margin: median -0.5, q25/q75 -8.0/+10.0;  $P(>+7)$  0.38,  $P(<-7)$  0.31
- Parent minus child: without 'off a loss': 14–15 (48.3%, n=29), the games it removed: 0–0 (—, n=0) | without 'off a 1-score loss': 29–31 (48.3%, n=60), the games it removed: 15–16 (48.4%, n=31) | without 'off a loss as dog': 23–25 (47.9%, n=48), the games it removed: 9–10 (47.4%, n=19)
- Anchor alone 82–80–1 (50.6%, n=163); anchor minus stack 68–65–1 (51.1%, n=134)
- Stack by line bucket: +3.5 to +6.5 14–15 (48.3%, n=29)
