## PIT at CLE · Thursday 2026-10-01 20:15 ET · Week 4 2026

League-wide only. Window: weeks 4–9, 2015–2025.  $n \geq 10$ . No team streaks. No half-EPA. Lines from nflverse games.csv (snapshot Oct 1). Scores and team-week stats through Week 3; EPA from play-by-play.

**Line:** PIT -2.5 / CLE +2.5, total 38.5. Trip: PIT → CLE 106 mi, 0 time zones. Rest: PIT 4 days, CLE 4 days. Roof: outdoors.

### 1. Season boxes

| Wk | Team | Spot     | Score | Line | ATS   | Off yds | Rush | Pass EPA | Off EPA | Def EPA allowed | SR   | TO |
|----|------|----------|-------|------|-------|---------|------|----------|---------|-----------------|------|----|
| 1  | PIT  | H vs ATL | 20–13 | -6.5 | cover | 279     | 58   | -9.7     | -16.3   | -21.5           | 0.34 | 1  |
| 2  | PIT  | A at NE  | 3–20  | +4.5 | miss  | 278     | 91   | -21.8    | -22.2   | -1.9            | 0.39 | 2  |
| 3  | PIT  | H vs CIN | 30–27 | +3.5 | cover | 430     | 138  | +8.5     | +11.3   | +14.8           | 0.49 | 1  |
| 1  | CLE  | A at JAX | 10–34 | +8.5 | miss  | 292     | 87   | -5.6     | -10.5   | +16.7           | 0.43 | 2  |
| 2  | CLE  | A at TB  | 23–19 | +8.5 | cover | 282     | 44   | +10.4    | +1.0    | -13.0           | 0.45 | 0  |
| 3  | CLE  | H vs CAR | 21–18 | +2.5 | cover | 276     | 132  | +2.1     | +0.2    | -7.7            | 0.38 | 1  |

Last game EPA (PBP): PIT off +11.3, def allowed +14.8, net -3.6, SR 0.49. CLE off +0.2, def allowed -7.7, net +7.9, SR 0.38. Records: PIT 2–1, CLE 2–1. ATS: PIT 2–1, CLE 2–1.

### 2. Lookahead and rest

- PIT: last played week 3 (Sunday early window, home, won by 3). 4 days rest. Week 5: home vs IND, non-division, Sunday early window.
- CLE: last played week 3 (Sunday early window, home, won by 3). 4 days rest. Week 5: road vs NYJ, non-division, Sunday early window.

### 3. Sides — CLE +2.5

#### CLE (home dog)

Spot anchors (nested — the same games appear in more than one row; identical populations are collapsed below):

| Cut                              | ATS       | Pct   | n   |
|----------------------------------|-----------|-------|-----|
| home dog                         | 168–169–8 | 49.9% | 345 |
| Thursday night home dog          | 13–15–1   | 46.4% | 29  |
| division home dog                | 56–53–2   | 51.4% | 111 |
| home dog +1 to +3                | 75–90–7   | 45.5% | 172 |
| division home dog +1 to +3       | 26–32–1   | 44.8% | 59  |
| Thursday night division home dog | 8–9–1     | 47.1% | 18  |
| Thursday night dog +1 to +3      | 12–15–1   | 44.4% | 28  |

Conditionals on those anchors, ranked by distance from 50% scaled by n:

| Cut                                                       | ATS      | Pct   | n   |

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to CLE
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤10 last: no
- short week: applies to CLE, PIT
- trip ≥1000 mi: no
- TO ≥3 last: no
- undefeated entering: no

- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **CLE +2.5** — one population: Thursday night dog +1 to +3; outdoors. ATS 9–10–1 (47.4%, n=20). Not added (n would fall under 20, or the trait does not narrow the population): off a win, off a 1-score win, off a cover, off an upset win as dog, off a home game, 2nd straight home game, host of a short-trip visitor (<200 mi), next game is road....
- By season: 15:0-0 16:1-1 17:3-1 18:1-1 19:1-1 20:2-0 21:0-2 22:1-2 23:0-1 24:0-1
- Cover margin: median -0.5, q25/q75 -7.6/+8.4; P(>+7) 0.30, P(<-7) 0.25
- Parent minus child: without 'outdoors': 12–15–1 (44.4%, n=28), the games it removed: 3–5 (37.5%, n=8)
- Anchor alone 12–15–1 (44.4%, n=28); anchor minus stack 3–5 (37.5%, n=8)
- Stack by line bucket: +1 to +3 9–10–1 (47.4%, n=20)
- **PIT -2.5** — one population: Thursday night fav -1 to -3; outdoors. ATS 10–9–1 (52.6%, n=20). Not added (n would fall under 20, or the trait does not narrow the population): off a win, off a 1-score win, off a cover, off an upset win as dog, off a home game, off a division game, short trip <200 mi, 0 time zones....
- By season: 15:0-0 16:1-1 17:1-3 18:1-1 19:1-1 20:0-2 21:2-0 22:2-1 23:1-0 24:1-0
- Cover margin: median +0.5, q25/q75 -8.4/+7.6; P(>+7) 0.25, P(<-7) 0.30
- Parent minus child: without 'outdoors': 15–12–1 (55.6%, n=28), the games it removed: 5–3 (62.5%, n=8)
- Anchor alone 15–12–1 (55.6%, n=28); anchor minus stack 5–3 (62.5%, n=8)
- Stack by line bucket: -1 to -3 10–9–1 (52.6%, n=20)

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored  $\leq 10$  last: no
- short week: no
- trip  $\geq 1000$  mi: no
- TO  $\geq 3$  last: applies to IND
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **WAS +3.5** — one population: dog +3.5 to +6.5 (all sites); off a win; off a 1-score win; off a cover; off an upset win as dog; equal rest. ATS 10–12–1 (45.5%, n=23). Not added (n would fall under 20, or the trait does not narrow the population): next game is division, opponent off a win, opponent off a cover, both off a win, scored 27–33 last, scored ≥30 last, allowed ≥27 last, allowed ≥30 last....
- By season: 15:2-1 16:0-1 18:0-1 19:2-0 20:1-2 21:0-1 22:2-2 23:0-2 24:2-1 25:1-1
- Cover margin: median -0.5, q25/q75 -7.8/+3.0; P(>+7) 0.17, P(<-7) 0.30
- Parent minus child: without 'off a win': 10–12–1 (45.5%, n=23), the games it removed: 0–0 (—, n=0) | without 'off a 1-score win': 18–22–1 (45.0%, n=41), the games it removed: 8–10 (44.4%, n=18) | without 'off a cover': 10–12–1 (45.5%, n=23), the games it removed: 0–0 (—, n=0) | without 'off an upset win as dog': 14–20–1 (41.2%, n=35), the games it removed: 4–8 (33.3%, n=12) | without 'equal rest': 20–20–1 (50.0%, n=41), the games it removed: 10–8 (55.6%, n=18)
- Anchor alone 154–154–2 (50.0%, n=310); anchor minus stack 144–142–1 (50.3%, n=287)
- Stack by line bucket: +3.5 to +6.5 10–12–1 (45.5%, n=23)
- **IND -3.5** — one population: fav -3.5 to -6.5 (all sites); off a win; off a 1-score win; off a cover; off an upset win as dog; outdoors. ATS 16–6 (72.7%, n=22). Not added (n would fall under 20, or the trait does not narrow the population): off a division game, equal rest, opponent off a win, opponent off a cover, both off a win, scored ≤21 last, allowed ≤17 last, allowed ≤21 last....
- By season: 15:1-0 16:2-1 17:4-0 18:2-1 20:1-0 21:2-1 22:0-1 23:1-1 25:3-1

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to TEN
- bye next week: no
- off a bye: no
- scored  $\leq 10$  last: applies to TEN
- short week: no
- trip  $\geq 1000$  mi: no
- TO  $\geq 3$  last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **BAL –11.5** — one population: Sunday early window fav –10 or more; off a win; off a win as favorite; opponent off a loss; opponent off an ATS miss. ATS 9–12 (42.9%,  $n=21$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a 1-score win, off a neutral-site game, next game is road, next game is road non-division, next game is prime time, equal rest, off a win, opponent off a loss, scored  $\geq 30$  last....
- By season: 16:1-0 17:1-0 18:1-0 19:2-1 20:0-3 21:2-2 22:1-3 23:1-0 25:0-3
- Cover margin: median -3.0, q25/q75 -8.5/+10.0;  $P(>+7)$  0.33,  $P(<-7)$  0.33

- Parent minus child: without 'off a win': 9–12 (42.9%, n=21), the games it removed: 0–0 (—, n=0) | without 'off a win as favorite': 10–13 (43.5%, n=23), the games it removed: 1–1 (50.0%, n=2) | without 'opponent off a loss': 10–12 (45.5%, n=22), the games it removed: 1–0 (100.0%, n=1) | without 'opponent off an ATS miss': 11–12 (47.8%, n=23), the games it removed: 2–0 (100.0%, n=2)
- Anchor alone 26–25–2 (51.0%, n=53); anchor minus stack 17–13–2 (56.7%, n=32)
- Stack by line bucket: -10 or more 9–12 (42.9%, n=21)
- **TEN +11.5** — one population: Sunday early window dog +10 or more; off a loss; off an ATS miss; off a loss as dog; next opponent is a favorite over them (n\_line>0). ATS 12–9 (57.1%, n=21). Not added (n would fall under 20, or the trait does not narrow the population): off a 1-score loss, off a road game, 2nd straight road game, trip 200–1000 mi, 1 time zone, next game is home, next game is division, equal rest....
- By season: 16:0-2 17:1-1 18:0-1 19:0-2 20:2-0 21:4-1 22:4-0 23:0-2 25:1-0
- Cover margin: median +1.0, q25/q75 -7.0/+12.0; P(>+7) 0.38, P(<-7) 0.24
- Parent minus child: without 'off a loss': 12–9 (57.1%, n=21), the games it removed: 0–0 (—, n=0) | without 'off an ATS miss': 13–14 (48.1%, n=27), the games it removed: 1–5 (16.7%, n=6) | without 'off a loss as dog': 15–10 (60.0%, n=25), the games it removed: 3–1 (75.0%, n=4) | without 'next opponent is a favorite over them (n\_line>0)': 15–11–1 (57.7%, n=27), the games it removed: 3–2–1 (60.0%, n=6)
- Anchor alone 25–26–2 (49.0%, n=53); anchor minus stack 13–17–2 (43.3%, n=32)
- Stack by line bucket: +10 or more 12–9 (57.1%, n=21)

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: applies to NE
- off a 20-point win: no
- 2nd straight home game: applies to BUF
- 2nd straight road game: applies to NE
- bye next week: no
- off a bye: no
- scored  $\leq 10$  last: applies to NE
- short week: no
- trip  $\geq 1000$  mi: no

- TO  $\geq 3$  last: applies to BUF, NE
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **BUF -7.0** — one population: division home fav -7 to -9.5; off a win. ATS 8-11-2 (42.1%, n=21). Not added (n would fall under 20, or the trait does not narrow the population): off a 1-score win, off a cover, off a win as favorite, off a home game, 2nd straight home game, next game is road, next game is road non-division, next game is prime time....
- By season: 15:2-2 17:2-0 18:1-1 20:1-1 21:1-1 22:0-1 23:0-1 24:0-1 25:1-3
- Cover margin: median -1.5, q25/q75 -9.0/+13.0;  $P(>+7)$  0.33,  $P(<-7)$  0.33
- Parent minus child: without 'off a win': 16-14-2 (53.3%, n=32), the games it removed: 8-3 (72.7%, n=11)
- Anchor alone 16-14-2 (53.3%, n=32); anchor minus stack 8-3 (72.7%, n=11)
- Stack by line bucket: -7 to -9.5 8-11-2 (42.1%, n=21)
- **NE +7.0** — one population: division road dog +7 to +9.5; off a loss. ATS 11-11-1 (50.0%, n=23). Not added (n would fall under 20, or the trait does not narrow the population): off a loss by 10+, off a loss by 20+, off an ATS miss, off a loss as dog, off a road game, 2nd straight road game, trip 200-1000 mi, 0 time zones....
- By season: 15:2-1 16:0-1 17:0-2 18:0-1 19:1-0 20:2-1 21:1-1 22:1-0 23:1-2 24:1-0 25:2-2
- Cover margin: median +0.0, q25/q75 -10.5/+9.0;  $P(>+7)$  0.35,  $P(<-7)$  0.35
- Parent minus child: without 'off a loss': 14-16-2 (46.7%, n=32), the games it removed: 3-5-1 (37.5%, n=9)
- Anchor alone 14-16-2 (46.7%, n=32); anchor minus stack 3-5-1 (37.5%, n=9)
- Stack by line bucket: +7 to +9.5 11-11-1 (50.0%, n=23)

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: applies to CHI
- 2nd straight home game: applies to CHI
- 2nd straight road game: applies to NYJ
- bye next week: no
- off a bye: no
- scored  $\leq 10$  last: no
- short week: no
- trip  $\geq 1000$  mi: no
- TO  $\geq 3$  last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **CHI -3.5** — one population: Sunday early window fav -3.5 to -6.5; off a win; off a win by 14+; allowed  $\leq 17$  last; TO  $\leq 1$  last. ATS 8–12–1 (40.0%,  $n=21$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a win by 20+, off a cover, off an upset win as dog, off a prime-time game, off a home game, 2nd straight home game, next game is road, next game is division....
- By season: 15:0-2 16:1-2 17:3-1 18:0-1 19:2-1 20:1-1 22:1-1 23:0-1 24:0-1 25:0-1
- Cover margin: median -4.5, q25/q75 -11.5/+2.0;  $P(>+7)$  0.19,  $P(<-7)$  0.43
- Parent minus child: without 'off a win': 8–12–1 (40.0%,  $n=21$ ), the games it removed: 0–0 (—,  $n=0$ ) | without 'off a win by 14+': 15–20–1 (42.9%,  $n=36$ ), the games it removed: 7–8 (46.7%,  $n=15$ ) | without 'allowed  $\leq 17$  last': 10–15–1 (40.0%,  $n=26$ ), the games it removed: 2–3 (40.0%,  $n=5$ ) | without 'TO  $\leq 1$  last': 10–15–1 (40.0%,  $n=26$ ), the games it removed: 2–3 (40.0%,  $n=5$ )
- Anchor alone 80–82–1 (49.4%,  $n=163$ ); anchor minus stack 72–70 (50.7%,  $n=142$ )
- Stack by line bucket: -3.5 to -6.5 8–12–1 (40.0%,  $n=21$ )
- **NYJ +3.5** — one population: Sunday early window dog +3.5 to +6.5; off a loss; off a 1-score loss; off a loss as dog. ATS 14–15 (48.3%,  $n=29$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a road game, 2nd straight road game, trip 200–1000 mi, 1 time zone, next game is home, next game is home non-division, opponent off a win, opponent off a win by 20+....
- By season: 15:1-2 16:3-1 17:3-0 18:0-1 19:3-1 20:2-2 21:0-2 22:2-1 24:0-3 25:0-2

- Cover margin: median -0.5, q25/q75 -8.0/+10.0;  $P(>+7)$  0.38,  $P(<-7)$  0.31
- Parent minus child: without 'off a loss': 14–15 (48.3%, n=29), the games it removed: 0–0 (—, n=0) | without 'off a 1-score loss': 29–31 (48.3%, n=60), the games it removed: 15–16 (48.4%, n=31) | without 'off a loss as dog': 23–25 (47.9%, n=48), the games it removed: 9–10 (47.4%, n=19)
- Anchor alone 82–80–1 (50.6%, n=163); anchor minus stack 68–65–1 (51.1%, n=134)
- Stack by line bucket: +3.5 to +6.5 14–15 (48.3%, n=29)

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: applies to JAX
- 2nd straight home game: no
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤10 last: no
- short week: no
- trip ≥1000 mi: no
- TO ≥3 last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **CIN -2.5** — one population: home fav -1 to -3; off a loss; off a 1-score loss; off an ATS miss; off a loss as favorite. ATS 11-11-1 (50.0%, n=23). Not added (n would fall under 20, or the trait does not narrow the population): off a road game, off a division game, next game is road, next game is road non-division, equal rest, opponent off a win, opponent off a win by 20+, opponent off a cover....
- By season: 15:0-1 16:2-1 17:0-1 19:1-0 20:1-1 21:0-2 22:3-1 23:1-2 24:1-1 25:2-1
- Cover margin: median +0.0, q25/q75 -9.5/+9.8;  $P(>+7)$  0.35,  $P(<-7)$  0.30
- Parent minus child: without 'off a loss': 11-11-1 (50.0%, n=23), the games it removed: 0-0 (—, n=0) | without 'off a 1-score loss': 16-14-1 (53.3%, n=31), the games it removed: 5-3 (62.5%, n=8) | without 'off an ATS miss': 11-11-1 (50.0%, n=23), the games it removed: 0-0 (—, n=0) | without 'off a loss as favorite': 15-22-2 (40.5%, n=39), the games it removed: 4-11-1 (26.7%, n=16)
- Anchor alone 85-100-9 (45.9%, n=194); anchor minus stack 74-89-8 (45.4%, n=171)
- Stack by line bucket: -1 to -3 11-11-1 (50.0%, n=23)
- **JAX +2.5** — one population: road dog +1 to +3; off a win; off a win by 14+; off a win by 20+; off a win as favorite; allowed  $\leq 21$  last; TO  $\leq 1$  last. ATS 13-6-1 (68.4%, n=20). Not added (n would fall under 20, or the trait does not narrow the population): off a cover, off a home game, trip 200-1000 mi, 0 time zones, next game is home, next game is home non-division, equal rest, opponent off a loss....
- By season: 16:0-1 17:2-0 18:3-0 19:1-0 20:2-0 21:1-0 22:1-0 23:0-3 24:3-1 25:0-1
- Cover margin: median +3.8, q25/q75 -2.0/+16.2;  $P(>+7)$  0.40,  $P(<-7)$  0.20
- Parent minus child: without 'off a win': 13-6-1 (68.4%, n=20), the games it removed: 0-0 (—, n=0) | without 'off a win by 14+': 13-6-1 (68.4%, n=20), the games it removed: 0-0 (—, n=0) | without 'off a win by 20+': 18-7-1 (72.0%, n=26), the games it removed: 5-1 (83.3%, n=6) | without 'off a win as favorite': 16-6-1 (72.7%, n=23), the games it removed: 3-0 (100.0%, n=3) | without 'allowed  $\leq 21$  last': 14-6-1 (70.0%, n=21), the games it removed: 1-0 (100.0%, n=1) | without 'TO  $\leq 1$  last': 14-9-1 (60.9%, n=24), the games it removed: 1-3 (25.0%, n=4)
- Anchor alone 100-85-9 (54.1%, n=194); anchor minus stack 87-79-8 (52.4%, n=174)
- Stack by line bucket: +1 to +3 13-6-1 (68.4%, n=20)

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤10 last: no
- short week: no
- trip ≥1000 mi: no
- TO ≥3 last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is n ≥ 20 (tables use n ≥ 10) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **HOU –3.0** — one population: home fav –1 to –3; off a loss; off a 1-score loss; off an ATS miss; off a loss as favorite. ATS 11–11–1 (50.0%, n=23). Not added (n would fall under 20, or the trait does not narrow the population): off a road game, off a division game, next game is road, next game is division, equal rest, opponent off a loss, both off a loss, scored ≤17 last....
- By season: 15:0-1 16:2-1 17:0-1 19:1-0 20:1-1 21:0-2 22:3-1 23:1-2 24:1-1 25:2-1
- Cover margin: median +0.0, q25/q75 -9.5/+9.8; P(>+) 0.35, P(<-) 0.30
- Parent minus child: without 'off a loss': 11–11–1 (50.0%, n=23), the games it removed: 0–0 (—, n=0) | without 'off a 1-score loss': 16–14–1 (53.3%, n=31), the games it removed: 5–3 (62.5%, n=8) | without 'off an ATS miss': 11–11–1 (50.0%, n=23), the games it removed: 0–0 (—, n=0) | without 'off a loss as favorite': 15–22–2 (40.5%, n=39), the games it removed: 4–11–1 (26.7%, n=16)
- Anchor alone 85–100–9 (45.9%, n=194); anchor minus stack 74–89–8 (45.4%, n=171)

- Stack by line bucket: -1 to -3 11-11-1 (50.0%, n=23)
- **DAL +3.0** — one population: road dog +1 to +3; off a loss; off a 1-score loss; off a loss as dog. ATS 12-13-1 (48.0%, n=26). Not added (n would fall under 20, or the trait does not narrow the population): off a neutral-site game, trip 200-1000 mi, 0 time zones, next game is home, next game is home non-division, next game is prime time, next game is Thursday (short week ahead), equal rest....
- By season: 15:0-1 16:1-2 17:2-0 18:1-0 20:1-0 21:0-2 22:1-1 23:3-2 24:1-2 25:2-3
- Cover margin: median -0.2, q25/q75 -6.0/+8.6; P(>+7) 0.27, P(<-7) 0.19
- Parent minus child: without 'off a loss': 12-13-1 (48.0%, n=26), the games it removed: 0-0 (—, n=0) | without 'off a 1-score loss': 24-25-2 (49.0%, n=51), the games it removed: 12-12-1 (50.0%, n=25) | without 'off a loss as dog': 22-21-3 (51.2%, n=46), the games it removed: 10-8-2 (55.6%, n=20)
- Anchor alone 100-85-9 (54.1%, n=194); anchor minus stack 88-72-8 (55.0%, n=168)
- Stack by line bucket: +1 to +3 12-13-1 (48.0%, n=26)

## 6. What does not apply

- 2+ time-zone trip: applies to ARI
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to NYG
- 2nd straight road game: applies to ARI
- bye next week: no
- off a bye: no
- scored ≤10 last: no
- short week: no
- trip ≥1000 mi: applies to ARI
- TO ≥3 last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **NYG +2.5** — one population: home dog +1 to +3; off a win; off a 1-score win; off a cover; next game is road; next opponent is a favorite over them ( $n_{line} > 0$ ). ATS 12–8–3 (60.0%,  $n=23$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a win as favorite, off a home game, 2nd straight home game, host of a 2+ zone visitor, host of a  $\geq 1000$  mi visitor, next game is division, equal rest, opponent off a loss....
- By season: 15:1-0 16:3-2 17:2-0 18:0-1 19:1-0 20:1-0 21:0-1 22:2-1 23:0-2 24:1-0 25:1-1
- Cover margin: median +4.0, q25/q75 -5.0/+9.5;  $P(>+7)$  0.26,  $P(<-7)$  0.22
- Parent minus child: without 'off a win': 12–8–3 (60.0%,  $n=23$ ), the games it removed: 0–0 (—,  $n=0$ ) | without 'off a 1-score win': 14–12–3 (53.8%,  $n=29$ ), the games it removed: 2–4 (33.3%,  $n=6$ ) | without 'off a cover': 13–10–3 (56.5%,  $n=26$ ), the games it removed: 1–2 (33.3%,  $n=3$ ) | without 'next game is road': 12–13–3 (48.0%,  $n=28$ ), the games it removed: 0–5 (0.0%,  $n=5$ ) | without 'next opponent is a favorite over them ( $n_{line} > 0$ )': 15–11–3 (57.7%,  $n=29$ ), the games it removed: 3–3 (50.0%,  $n=6$ )
- Anchor alone 75–90–7 (45.5%,  $n=172$ ); anchor minus stack 63–82–4 (43.4%,  $n=149$ )
- Stack by line bucket: +1 to +3 12–8–3 (60.0%,  $n=23$ )
- **ARI -2.5** — one population: road fav -1 to -3; off a loss; off a 1-score loss; off a loss as dog. ATS 13–9 (59.1%,  $n=22$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a cover, off a road game, 2nd straight road game, off a division game, trip  $\geq 1000$  mi, trip  $\geq 2000$  mi, 2+ time zones, west team east, early kick....
- By season: 15:1-1 16:0-2 17:2-2 18:1-1 20:1-0 21:0-1 22:3-1 23:2-0 24:3-1
- Cover margin: median +2.5, q25/q75 -7.1/+12.0;  $P(>+7)$  0.32,  $P(<-7)$  0.27
- Parent minus child: without 'off a loss': 13–9 (59.1%,  $n=22$ ), the games it removed: 0–0 (—,  $n=0$ ) | without 'off a 1-score loss': 23–15–2 (60.5%,  $n=40$ ), the games it removed: 10–6–2 (62.5%,  $n=18$ ) | without 'off a loss as dog': 24–20–2 (54.5%,  $n=46$ ), the games it removed: 11–11–2 (50.0%,  $n=24$ )
- Anchor alone 90–75–7 (54.5%,  $n=172$ ); anchor minus stack 77–66–7 (53.8%,  $n=150$ )
- Stack by line bucket: -1 to -3 13–9 (59.1%,  $n=22$ )

## 6. What does not apply

- 2+ time-zone trip: applies to LA
- double-digit dog: no
- off a 10-point loss: applies to PHI
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to LA
- bye next week: no
- off a bye: no
- scored ≤10 last: applies to PHI
- short week: no
- trip ≥1000 mi: applies to LA
- TO ≥3 last: applies to PHI
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **PHI +3.5** — one population: home dog +3.5 to +6.5; off a loss; off a loss by 10+; off an ATS miss; off a road game. ATS 9–12 (42.9%,  $n=21$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a loss by 20+, off a loss as favorite, off a prime-

time game, host of a 2+ zone visitor, host of a  $\geq 1000$  mi visitor, next game is road, next game is road non-division, next opponent is a favorite over them ( $n\_line > 0$ )....

- By season: 16:1-0 17:2-1 18:1-1 20:1-2 21:1-1 22:1-1 23:2-1 24:0-3 25:0-2
- Cover margin: median -0.5, q25/q75 -11.0/+2.5;  $P(>+7)$  0.14,  $P(<-7)$  0.29
- Parent minus child: without 'off a loss': 9-12 (42.9%, n=21), the games it removed: 0-0 (—, n=0) | without 'off a loss by 10+': 13-15 (46.4%, n=28), the games it removed: 4-3 (57.1%, n=7) | without 'off an ATS miss': 10-12 (45.5%, n=22), the games it removed: 1-0 (100.0%, n=1) | without 'off a road game': 14-19 (42.4%, n=33), the games it removed: 5-7 (41.7%, n=12)
- Anchor alone 48-57 (45.7%, n=105); anchor minus stack 39-45 (46.4%, n=84)
- Stack by line bucket: +3.5 to +6.5 9-12 (42.9%, n=21)
- **LA -3.5** — one population: road fav -3.5 to -6.5; off a loss; off a 1-score loss. ATS 18-3 (85.7%, n=21). Not added (n would fall under 20, or the trait does not narrow the population): off an ATS miss, off a loss as dog, off a prime-time game, off a road game, 2nd straight road game, trip  $\geq 1000$  mi, trip  $\geq 2000$  mi, 2+ time zones....
- By season: 15:2-0 16:1-0 17:3-1 19:2-0 20:2-0 21:2-0 23:1-0 24:5-1 25:0-1
- Cover margin: median +8.5, q25/q75 +3.5/+14.0;  $P(>+7)$  0.57,  $P(<-7)$  0.05
- Parent minus child: without 'off a loss': 18-3 (85.7%, n=21), the games it removed: 0-0 (—, n=0) | without 'off a 1-score loss': 23-16 (59.0%, n=39), the games it removed: 5-13 (27.8%, n=18)
- Anchor alone 57-48 (54.3%, n=105); anchor minus stack 39-45 (46.4%, n=84)
- Stack by line bucket: -3.5 to -6.5 18-3 (85.7%, n=21)

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: applies to GB
- off a 20-point win: no
- 2nd straight home game: applies to TB
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤10 last: no
- short week: no
- trip ≥1000 mi: applies to GB
- TO ≥3 last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **TB +3.5** — one population: home dog +3.5 to +6.5; off a loss; off a 1-score loss; off a loss as dog. ATS 12–11 (52.2%, n=23). Not added (n would fall under 20, or the trait does not narrow the population): off an ATS miss, off a home game, 2nd straight home game, host of a ≥1000 mi visitor, next game is road, next game is road non-division, next game is prime time, next game is Thursday (short week ahead)....
- By season: 15:2-1 16:1-1 17:1-1 18:1-0 19:2-2 20:2-0 21:1-2 22:2-1 24:0-3
- Cover margin: median +0.5, q25/q75 -10.5/+5.5; P(>+7) 0.22, P(<-7) 0.30
- Parent minus child: without 'off a loss': 12–11 (52.2%, n=23), the games it removed: 0–0 (—, n=0) | without 'off a 1-score loss': 25–24 (51.0%, n=49), the games it removed: 13–13 (50.0%, n=26) | without 'off a loss as dog': 14–15 (48.3%, n=29), the games it removed: 2–4 (33.3%, n=6)
- Anchor alone 48–57 (45.7%, n=105); anchor minus stack 36–46 (43.9%, n=82)
- Stack by line bucket: +3.5 to +6.5 12–11 (52.2%, n=23)
- **GB -3.5** — one population: road fav -3.5 to -6.5; off a loss; off an ATS miss; off a loss as favorite; off a home game. ATS 16–5 (76.2%, n=21). Not added (n would fall under 20, or the trait does not narrow the population): off a loss by 10+, off a loss by 20+, off a prime-time game, trip ≥1000 mi, 1 time zone, next game is home, next game is division, long rest (≥10 days)....
- By season: 15:2-0 16:1-0 17:2-1 19:2-1 20:2-0 21:2-0 22:1-1 23:1-0 24:3-0 25:0-2
- Cover margin: median +6.0, q25/q75 +1.5/+11.0; P(>+7) 0.43, P(<-7) 0.05
- Parent minus child: without 'off a loss': 16–5 (76.2%, n=21), the games it removed: 0–0 (—, n=0) | without 'off an ATS miss': 16–5 (76.2%, n=21), the games it removed: 0–0 (—, n=0) | without 'off a loss as favorite': 18–8 (69.2%, n=26), the games it removed: 2–3 (40.0%, n=5) | without 'off a home game': 19–8 (70.4%, n=27), the games it removed: 3–3 (50.0%, n=6)
- Anchor alone 57–48 (54.3%, n=105); anchor minus stack 41–43 (48.8%, n=84)
- Stack by line bucket: -3.5 to -6.5 16–5 (76.2%, n=21)

## 6. What does not apply

- 2+ time-zone trip: applies to KC
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to KC
- bye next week: applies to KC
- off a bye: no
- scored ≤10 last: no
- short week: no
- trip ≥1000 mi: applies to KC
- TO ≥3 last: no
- undefeated entering: no

- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **LV +4.5** — one population: Sunday late window division home dog; next game is road. ATS 11–12 (47.8%,  $n=23$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a win, off a 1-score win, off a cover, off an upset win as dog, off a road game, host of a 2+ zone visitor, host of a  $\geq 1000$  mi visitor, next game is road non-division....
- By season: 15:0-1 16:0-1 17:1-1 18:4-1 19:1-1 20:1-1 22:1-1 23:1-0 24:2-4 25:0-1
- Cover margin: median -1.0,  $q_{25}/q_{75}$  -11.2/+5.0;  $P(>+7)$  0.17,  $P(<-7)$  0.35
- Parent minus child: without 'next game is road': 12–15 (44.4%,  $n=27$ ), the games it removed: 1–3 (25.0%,  $n=4$ )
- Anchor alone 12–15 (44.4%,  $n=27$ ); anchor minus stack 1–3 (25.0%,  $n=4$ )
- Stack by line bucket: +1 to +3 6–7 (46.2%,  $n=13$ ); +3.5 to +6.5 1–4 (20.0%,  $n=5$ ); +7 to +9.5 4–1 (80.0%,  $n=5$ )
- **KC -4.5** — one population: Sunday late window division road favorite. ATS 15–12 (55.6%,  $n=27$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a win, off a win by 14+, off a cover, off a win as favorite, off a road game, 2nd straight road game, trip  $\geq 1000$  mi, 2+ time zones....
- By season: 15:1-0 16:1-0 17:2-1 18:1-4 19:1-1 20:2-1 21:0-1 22:2-1 23:0-1 24:4-2 25:1-0
- Cover margin: median +4.0,  $q_{25}/q_{75}$  -5.0/+11.2;  $P(>+7)$  0.37,  $P(<-7)$  0.19
- Anchor alone 15–12 (55.6%,  $n=27$ ); anchor minus stack 0–0 (—,  $n=0$ )
- Stack by line bucket: -1 to -3 9–6 (60.0%,  $n=15$ ); -3.5 to -6.5 4–2 (66.7%,  $n=6$ ); -7 to -9.5 2–4 (33.3%,  $n=6$ )

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: applies to MIA
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored  $\leq 10$  last: applies to MIA
- short week: no
- trip  $\geq 1000$  mi: applies to MIA
- TO  $\geq 3$  last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **MIN -10.5** — one population: home fav -10 or more; off a win; off a 1-score win. ATS 9-10-1 (47.4%, n=20). Not added (n would fall under 20, or the trait does not narrow the population): off a cover, off a win as favorite, off a road game, host of a  $\geq 1000$  mi visitor, next game is road, next game is road non-division, equal rest, opponent off a loss....
- By season: 15:1-0 17:0-1 18:0-1 19:1-4 20:1-0 21:2-1 22:1-3 23:1-0 24:1-0 25:1-0
- Cover margin: median -0.2, q25/q75 -5.1/+11.8;  $P(>+7)$  0.35,  $P(<-7)$  0.15
- Parent minus child: without 'off a win': 9-10-1 (47.4%, n=20), the games it removed: 0-0 (—, n=0) | without 'off a 1-score win': 28-19-1 (59.6%, n=48), the games it removed: 19-9 (67.9%, n=28)
- Anchor alone 38-33-2 (53.5%, n=73); anchor minus stack 29-23-1 (55.8%, n=53)
- Stack by line bucket: -10 or more 9-10-1 (47.4%, n=20)
- **MIA +10.5** — one population: road dog +10 or more; off a loss; off a loss by 10+; off an ATS miss; off a loss as dog; next game is home. ATS 9-12 (42.9%, n=21). Not added (n would fall under 20, or the trait does not narrow the population): off a home game, trip  $\geq 1000$  mi, 1 time zone, next game is home non-division, next opponent is a favorite over them ( $n\_line > 0$ ), equal rest, opponent off a win, opponent off a cover....
- By season: 15:1-0 17:0-1 18:1-0 19:0-1 21:2-3 22:1-1 23:1-1 24:0-3 25:3-2
- Cover margin: median -4.0, q25/q75 -8.5/+7.0;  $P(>+7)$  0.24,  $P(<-7)$  0.29
- Parent minus child: without 'off a loss': 9-12 (42.9%, n=21), the games it removed: 0-0 (—, n=0) | without 'off a loss by 10+': 11-12-1 (47.8%, n=24), the games it removed: 2-0-1 (100.0%, n=3) | without 'off an ATS miss': 10-14 (41.7%, n=24), the games it removed: 1-2 (33.3%, n=3) | without 'off a loss as dog': 9-14 (39.1%, n=23), the games it removed: 0-2 (0.0%, n=2) | without 'next game is home': 11-17 (39.3%, n=28), the games it removed: 2-5 (28.6%, n=7)
- Anchor alone 33-38-2 (46.5%, n=73); anchor minus stack 24-26-2 (48.0%, n=52)
- Stack by line bucket: +10 or more 9-12 (42.9%, n=21)

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to LAC
- bye next week: no
- off a bye: no
- scored ≤10 last: no
- short week: no
- trip ≥1000 mi: no
- TO ≥3 last: applies to SEA
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is n ≥ 20 (tables use n ≥ 10) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **SEA -7.0** — one population: Sunday late window fav -7 to -9.5; off a road game. ATS 8-11-1 (42.1%, n=20). Not added (n would fall under 20, or the trait does not narrow the population): off a loss, off a 1-score loss, off an ATS miss, off a loss as favorite, next game is home, next game is division, equal rest, opponent off a loss....
- By season: 15:0-2 16:0-2 18:1-2 19:1-1 20:3-0 22:1-0 23:1-0 24:1-4
- Cover margin: median -1.2, q25/q75 -5.1/+6.1; P(>+7) 0.25, P(<-7) 0.20
- Parent minus child: without 'off a road game': 13-26-1 (33.3%, n=40), the games it removed: 5-15 (25.0%, n=20)
- Anchor alone 13-26-1 (33.3%, n=40); anchor minus stack 5-15 (25.0%, n=20)
- Stack by line bucket: -7 to -9.5 8-11-1 (42.1%, n=20)
- **LAC +7.0** — one population: Sunday late window dog +7 to +9.5; off a loss; off an ATS miss; scored ≤21 last. ATS 11-8-1 (57.9%, n=20). Not added (n would fall under 20, or the trait does not narrow the population): off a 1-score loss, off a loss as dog, off a road game, 2nd straight road game, trip 200-1000 mi, 0 time zones, next game is home, next game is division....
- By season: 15:2-2 16:1-1 17:1-0 18:1-0 19:1-0 20:0-2 23:1-2 24:3-1 25:1-0
- Cover margin: median +1.2, q25/q75 -4.2/+8.6; P(>+7) 0.35, P(<-7) 0.20
- Parent minus child: without 'off a loss': 12-8-1 (60.0%, n=21), the games it removed: 1-0 (100.0%, n=1) | without 'off an ATS miss': 14-8-1 (63.6%, n=23), the games it removed: 3-0 (100.0%, n=3) | without 'scored ≤21 last': 13-9-1 (59.1%, n=23), the games it removed: 2-1 (66.7%, n=3)
- Anchor alone 26-13-1 (66.7%, n=40); anchor minus stack 15-5 (75.0%, n=20)
- Stack by line bucket: +7 to +9.5 11-8-1 (57.9%, n=20)

Feeds: nflverse games.csv (lines, scores, rest), stats\_team\_week 2015-2026 (yards, pass EPA, TO), play\_by\_play 2015-2026 (off/def EPA, success rate), data/airports.csv (miles, zones).

## DEN at SF · Sunday 2026-10-04 16:25 ET · Week 4 2026

League-wide only. Window: weeks 4–9, 2015–2025.  $n \geq 10$ . No team streaks. No half-EPA. Lines from nflverse games.csv (snapshot Oct 1). Scores and team-week stats through Week 3; EPA from play-by-play.

**Line:** DEN +3.0 / SF -3.0, total 47.5. Trip: DEN → SF 965 mi, 1 time zone west. Rest: DEN 7 days, SF 7 days. Roof: outdoors.

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to SF
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored  $\leq 10$  last: no
- short week: no
- trip  $\geq 1000$  mi: no
- TO  $\geq 3$  last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **SF -3.0** — one population: Sunday late window fav -1 to -3; off a win; off a win as favorite; TO ≤1 last. ATS 10-10-1 (50.0%, n=21). Not added (n would fall under 20, or the trait does not narrow the population): off a 1-score win, off an ATS miss, off a home game, 2nd straight home game, off a division game, next game is road, next game is division, next opponent is a favorite over them (n\_line>0)....
- By season: 16:1-1 17:2-0 18:0-2 19:0-1 20:0-2 21:1-1 22:1-0 23:2-1 24:3-1 25:0-1
- Cover margin: median +0.0, q25/q75 -12.5/+6.0; P(>+7) 0.24, P(<-7) 0.38
- Parent minus child: without 'off a win': 10-10-1 (50.0%, n=21), the games it removed: 0-0 (—, n=0) | without 'off a win as favorite': 18-16-1 (52.9%, n=35), the games it removed: 8-6 (57.1%, n=14) | without 'TO ≤1 last': 12-11-1 (52.2%, n=24), the games it removed: 2-1 (66.7%, n=3)
- Anchor alone 41-46-3 (47.1%, n=90); anchor minus stack 31-36-2 (46.3%, n=69)
- Stack by line bucket: -1 to -3 10-10-1 (50.0%, n=21)
- **DEN +3.0** — one population: Sunday late window dog +1 to +3; off a win; off a 1-score win; equal rest. ATS 12-9 (57.1%, n=21). Not added (n would fall under 20, or the trait does not narrow the population): off a cover, off a win as favorite, off a prime-time game, off a home game, trip 200-1000 mi, 1 time zone, next game is road, next game is division....
- By season: 15:1-1 16:0-1 17:3-0 18:1-0 19:2-1 20:1-1 21:2-0 22:1-2 23:0-1 24:0-2 25:1-0
- Cover margin: median +4.0, q25/q75 -8.0/+17.0; P(>+7) 0.33, P(<-7) 0.33
- Parent minus child: without 'off a win': 12-9 (57.1%, n=21), the games it removed: 0-0 (—, n=0) | without 'off a 1-score win': 16-12 (57.1%, n=28), the games it removed: 4-3 (57.1%, n=7) | without 'equal rest': 15-13 (53.6%, n=28), the games it removed: 3-4 (42.9%, n=7)
- Anchor alone 46-41-3 (52.9%, n=90); anchor minus stack 34-32-3 (51.5%, n=69)
- Stack by line bucket: +1 to +3 12-9 (57.1%, n=21)

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: no
- bye next week: applies to CAR
- off a bye: no
- scored  $\leq$ 10 last: no
- short week: no
- trip  $\geq$ 1000 mi: no
- TO  $\geq$ 3 last: no
- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **CAR +3.5** — one population: Sunday night dog +3.5 to +6.5. ATS 10–11 (47.6%,  $n=21$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a loss, off a 1-score loss, off an ATS miss, off a loss as favorite, off a road game, next game is road, next game is road non-division, bye next week....
- By season: 16:0-1 17:0-1 18:3-3 19:1-1 20:2-0 21:4-0 22:0-1 23:0-1 24:0-3
- Cover margin: median -0.5,  $q_{25}/q_{75}$  -2.5/+5.5;  $P(>+7)$  0.14,  $P(<-7)$  0.19

- Anchor alone 10–11 (47.6%, n=21); anchor minus stack 0–0 (—, n=0)
- Stack by line bucket: +3.5 to +6.5 10–11 (47.6%, n=21)
- **DET -3.5** — one population: Sunday night fav -3.5 to -6.5. ATS 11–10 (52.4%, n=21). Not added (n would fall under 20, or the trait does not narrow the population): off a win, off a 1-score win, off a win as favorite, off a home game, trip 200–1000 mi, 0 time zones, next game is road, next game is road non-division....
- By season: 16:1-0 17:1-0 18:3-3 19:1-1 20:0-2 21:0-4 22:1-0 23:1-0 24:3-0
- Cover margin: median +0.5, q25/q75 -5.5/+2.5; P(>+7) 0.19, P(<-7) 0.14
- Anchor alone 11–10 (52.4%, n=21); anchor minus stack 0–0 (—, n=0)
- Stack by line bucket: -3.5 to -6.5 11–10 (52.4%, n=21)

## 6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: applies to ATL
- 2nd straight home game: applies to NO
- 2nd straight road game: applies to ATL
- bye next week: no
- off a bye: no
- scored  $\leq$ 10 last: no
- short week: no
- trip  $\geq$ 1000 mi: no
- TO  $\geq$ 3 last: applies to NO

- undefeated entering: no
- winless entering: no

## 7. Stack, without double-counting

Stack floor is  $n \geq 20$  (tables use  $n \geq 10$ ) so the conjunction cannot bottom out on the cutoff. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **NO -2.5** — one population: Monday night home favorite; off a loss. ATS 12–8 (60.0%,  $n=20$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a 1-score loss, off an ATS miss, off a loss as favorite, off a home game, 2nd straight home game, next game is home, next game is home non-division, next opponent is a favorite over them ( $n_{line>0}$ )....
- By season: 15:0-2 16:2-1 17:2-0 18:0-2 19:1-0 20:1-0 21:0-1 22:1-0 23:2-0 24:0-1 25:3-1
- Cover margin: median +3.0, q25/q75 -6.8/+7.9;  $P(>+7)$  0.30,  $P(<-7)$  0.25
- Parent minus child: without 'off a loss': 27–23 (54.0%,  $n=50$ ), the games it removed: 15–15 (50.0%,  $n=30$ )
- Anchor alone 27–23 (54.0%,  $n=50$ ); anchor minus stack 15–15 (50.0%,  $n=30$ )
- Stack by line bucket: -1 to -3 3–1 (75.0%,  $n=4$ ); -3.5 to -6.5 4–4 (50.0%,  $n=8$ ); -7 to -9.5 5–1 (83.3%,  $n=6$ ); -10 or more 0–2 (0.0%,  $n=2$ )
- **ATL +2.5** — one population: Monday night road dog; off a cover; next game is home. ATS 9–12 (42.9%,  $n=21$ ). Not added ( $n$  would fall under 20, or the trait does not narrow the population): off a win, off a win by 14+, off a win by 20+, off an upset win as dog, off a prime-time game, off a road game, 2nd straight road game, trip 200–1000 mi....
- By season: 17:0-2 18:1-1 19:2-2 20:2-2 21:2-0 22:1-1 24:0-2 25:1-2
- Cover margin: median -3.5, q25/q75 -9.0/+4.0;  $P(>+7)$  0.14,  $P(<-7)$  0.38
- Parent minus child: without 'off a cover': 19–22 (46.3%,  $n=41$ ), the games it removed: 10–10 (50.0%,  $n=20$ ) | without 'next game is home': 10–13 (43.5%,  $n=23$ ), the games it removed: 1–1 (50.0%,  $n=2$ )
- Anchor alone 23–27 (46.0%,  $n=50$ ); anchor minus stack 14–15 (48.3%,  $n=29$ )
- Stack by line bucket: +1 to +3 1–3 (25.0%,  $n=4$ ); +3.5 to +6.5 3–7 (30.0%,  $n=10$ ); +7 to +9.5 3–2 (60.0%,  $n=5$ ); +10 or more 2–0 (100.0%,  $n=2$ )
