6. What does not apply

- 2+ time-zone trip: applies to ARI
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to NYG
- 2nd straight road game: applies to ARI
- bye next week: no
- off a bye: no
- scored ≤10 last: no
- short week: no
- trip ≥1000 mi: applies to ARI
- TO ≥3 last: no
- undefeated entering: no
- winless entering: no

7. Stack, without double-counting

Stack floor is $n \geq 20$ (tables use $n \geq 10$). Traits are added by largest parent-minus-child gap (the stack's pct against the pct of the games the trait removes), not by a fixed order. Under each stack: by-season W-L, cover-margin quartiles with signed tails, parent-minus-child (the stack without each trait, and the games that trait removed), the anchor's complement, and the stack split by line bucket.

- **NYG +2.5** — one population: home dog +1 to +3; off EPA ≤ -1 last; off yards ≤ 300 last; next opponent is a favorite over them ($n_line > 0$); next game is road. ATS 8–9–3 (47.1%, $n=20$). Not added (no gap with $n \geq 20$ left): equal rest, host of a 2+ zone visitor, host of a ≥ 1000 mi visitor, off a win, off a 1-score win, off a cover, off a win as favorite, off a home game....
- By season: 15:1-0 16:1-0 17:2-2 18:1-2 19:0-1 22:0-1 23:1-2 24:1-1 25:1-0
- Cover margin: median +0.0, q25/q75 -6.9/+5.1; $P(>+7)$ 0.20, $P(<-7)$ 0.25
- Parent minus child: without 'off EPA ≤ -1 last': 9–13–3 (40.9%, $n=25$), the games it removed: 1–4 (20.0%, $n=5$) | without 'off yards ≤ 300 last': 23–15–5 (60.5%, $n=43$), the games it removed: 15–6–2 (71.4%, $n=23$) | without 'next opponent is a favorite over them ($n_line > 0$)': 12–13–3 (48.0%, $n=28$), the games it removed: 4–4 (50.0%, $n=8$) | without 'next game is road': 8–15–3 (34.8%, $n=26$), the games it removed: 0–6 (0.0%, $n=6$)
- Anchor alone 75–90–7 (45.5%, $n=172$); anchor minus stack 67–81–4 (45.3%, $n=152$)
- Stack by line bucket: +1 to +3 8–9–3 (47.1%, $n=20$)
- **ARI -2.5** — one population: road fav -1 to -3; def EPA allowed $\geq +10$ last; TO ≤ 1 last; off a loss. ATS 10–11 (47.6%, $n=21$). Not added (no gap with $n \geq 20$ left): equal rest, trip ≥ 1000 mi, trip ≥ 2000 mi, 2+ time zones, west team east, early kick, off a 1-score loss, off a cover, off a loss as dog....
- By season: 15:1-2 16:0-1 17:0-1 18:1-2 19:0-1 20:2-0 21:1-0 22:0-1 23:3-0 24:0-1 25:2-2
- Cover margin: median -1.5, q25/q75 -9.5/+8.5; $P(>+7)$ 0.33, $P(<-7)$ 0.33
- Parent minus child: without 'def EPA allowed $\geq +10$ last': 21–19–2 (52.5%, $n=42$), the games it removed: 11–8–2 (57.9%, $n=21$) | without 'TO ≤ 1 last': 25–12–1 (67.6%, $n=38$), the games it removed: 15–1–1 (93.8%, $n=17$) | without 'off a loss': 13–13 (50.0%, $n=26$), the games it removed: 3–2 (60.0%, $n=5$)
- Anchor alone 90–75–7 (54.5%, $n=172$); anchor minus stack 80–64–7 (55.6%, $n=151$)
- Stack by line bucket: -1 to -3 10–11 (47.6%, $n=21$)
- **Total 44.5, tightest cut clearing $n = 20$:** line within 3, visitor crossing 2+ zones — O–U 52–40–1 (56.5%, $n=93$).
- By season (O–U): 15:3-2 16:7-4 17:9-0 18:4-1 19:6-2 20:2-3 21:5-4 22:3-7 23:4-7 24:2-6 25:7-4
- Total margin (points – line): median +1.5, q25/q75 -5.0/+7.0; $P(>+7)$ 0.25, $P(<-7)$ 0.22
- By total band: ≤ 39 2–3 ($n=5$); 40–44 20–14 ($n=34$); 45–49 26–18 ($n=44$); ≥ 50 4–5–1 ($n=10$)
