6. What does not apply

- 2+ time-zone trip: applies to KC
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: no
- 2nd straight road game: applies to KC
- bye next week: applies to KC
- off a bye: no
- scored ≤ 10 last: no
- short week: no
- trip ≥ 1000 mi: applies to KC
- TO ≥ 3 last: no
- undefeated entering: no

- winless entering: no

7. Stack, without double-counting

Stack floor is $n \geq 20$ (tables use $n \geq 10$) so the conjunction cannot bottom out on the cutoff.

- **LV +4.5** — one population: Sunday late window division home dog; next game is road. ATS 11–12 (47.8%, $n=23$). Not added (n would fall under 20, or the trait does not narrow the population): off a win, off a 1-score win, off a cover, off an upset win as dog, off a road game, host of a 2+ zone visitor, host of a ≥ 1000 mi visitor, next game is road non-division....
- **KC -4.5** — one population: Sunday late window division road favorite. ATS 15–12 (55.6%, $n=27$). Not added (n would fall under 20, or the trait does not narrow the population): off a win, off a win by 14+, off a cover, off a win as favorite, off a road game, 2nd straight road game, trip ≥ 1000 mi, 2+ time zones....
