6. What does not apply

- 2+ time-zone trip: no
- double-digit dog: no
- off a 10-point loss: no
- off a 20-point win: no
- 2nd straight home game: applies to CLE
- 2nd straight road game: no
- bye next week: no
- off a bye: no
- scored ≤10 last: no
- short week: applies to CLE, PIT
- trip ≥1000 mi: no
- TO ≥3 last: no
- undefeated entering: no

- winless entering: no

7. Stack, without double-counting

Stack floor is $n \geq 20$ (tables use $n \geq 10$) so the conjunction cannot bottom out on the cutoff.

- **CLE +2.5** — one population: Thursday night dog +1 to +3; outdoors. ATS 9–10–1 (47.4%, $n=20$). Not added (n would fall under 20, or the trait does not narrow the population): off a win, off a 1-score win, off a cover, off an upset win as dog, off a home game, 2nd straight home game, host of a short-trip visitor (<200 mi), next game is road....
- **PIT -2.5** — one population: Thursday night fav -1 to -3; outdoors. ATS 10–9–1 (52.6%, $n=20$). Not added (n would fall under 20, or the trait does not narrow the population): off a win, off a 1-score win, off a cover, off an upset win as dog, off a home game, off a division game, short trip <200 mi, 0 time zones....
